Summary

Forward Deployed Engineer bridging the gap between advanced AI capabilities and enterprise operations. I build, orchestrate, and deploy AI agents in production, embedding them into existing workflows. Highly independent with a founder's mindset, I write real codeTypeScript, Python, Next.js, Node.jsand wire LLMs, APIs, and data pipelines end to end, working closely with stakeholders to ensure measurable operational success.

Skills

- **Languages & Frameworks:** TypeScript, Python, Next.js (React), Node.js, Laravel (PHP), JavaScript
- **AI & Orchestration:** Claude, OpenAI APIs, LLM integration, AI workers, RAG, n8n, Eden AI
- **Enterprise Integration:** REST APIs, webhooks, CRM automation, complex data pipelines
- **Engineering & DevOps:** Playwright, GitHub, testing, human-in-the-loop review, platform migrations

Selected Projects

- **Autonomous AI Listing Worker (FlowSpace):** Built a human-in-the-loop tool that ingests unstructured brochures (PDF, website, spreadsheet), drafts full listings using LLMs, and seamlessly pushes them to the backend. Owned end to end. Stack: TypeScript, Claude, n8n.
- **Enterprise Platform Migration (FlowSpace):** Led the move from a legacy no-code stack to a coded Next.js and Laravel architecture. Mapped data models, drove the cutover, and scaled the platform from 2,000 to 4,500+ users.
- **CV Parsing & Extraction Pipeline (UltraStrategy):** Developed an LLM-powered data extraction pipeline orchestrating multiple user profiles and complex workflows using n8n and Eden AI.
- **CRM & GTM Automation Pipeline:** Built a CRM-to-platform integration for automated lead capture, enrichment, routing, and outbound messaging, drastically reducing manual operational overhead.
