Summary

Full-stack AI Solutions and Machine Learning Engineer specializing in Agentic AI, Generative AI, and large-scale data pipelines. Proven experience leading end-to-end architecture and operationalizing Large Language Models (LLMs) in production. Skilled in designing scalable AI pipelines, automating CI/CD workflows, and migrating legacy systems to modern, high-performance stacks. Adept at bridging the gap between product engineering and AI model lifecycle management to deliver tangible business value in agile environments.

Skills

- **AI & Machine Learning:** Generative AI, LLMs (Claude, OpenAI), Agentic AI, MLOps, RAG, Prompt Engineering, Model Lifecycle Management & Observability
- **Engineering & Pipelines:** Python, TypeScript, Laravel (PHP), Next.js, JavaScript, Data Pipelines, Automation (n8n, Make), CI/CD Implementation
- **Infrastructure & APIs:** REST APIs, Webhooks, Third-Party Integrations, Systems Orchestration
- **Tools & Practices:** Agile environments, Playwright, Git, Postman, Figma, Human-in-the-loop review

Experience

FlowSpace.co **Mar 2024 – Present**
Lead AI Solutions Engineer *London, UK (Remote)*

- **End-to-End AI Solutions:** Designed, fine-tuned, and shipped a production-ready AI listing bot that ingests multimodal formats (PDF, web, images) and orchestrates LLMs to draft optimized listings.
- **Agentic AI & Automation:** Developed Agentic AI systems utilizing RAG architectures to triage and resolve customer support queries, and built CRM-to-platform integrations for automated outbound routing.
- **System Scale & Orchestration:** Led a full platform migration from a legacy no-code stack to a Next.js/Laravel architecture, ensuring CI/CD pipeline stability and scaling platform capacity from 2,000 to over 4,500 active users.
- **MLOps & Optimization:** Established monitoring and observability for AI pipelines, instituting a human-in-the-loop review process to evaluate and continuously optimize LLM output quality.

Urlink **Apr 2025 – Jul 2025**
Project Manager & AI Developer *Barcelona, Spain*

- Built and operationalized client-driven AI platform features utilizing automated deployment practices on Supabase and Netlify.

UltraStrategy.com **Dec 2024 – May 2025**
Automation & AI Developer *France*

- Engineered advanced CV-parsing pipelines utilizing LLMs (Eden AI) and orchestration frameworks (n8n) to extract, structure, and integrate unstructured data streams.

Get2Germany.com **Jan 2024 – May 2024**
Lead Developer & Automation Specialist *Berlin, Germany*

- Designed automated pipelines parsing large-scale public data for courses and job placements utilizing APIs and LLM automation tools. Optimized database architectures for high throughput in an agile setup.

Clubee.com **Sep 2023 – Aug 2024**
Full-Stack Developer & QA *Foetz, Luxembourg*

- Delivered rigorous testing (QA) and robust API integrations across front-end systems and legacy services in an Agile environment.

Selected Projects

- **Generative AI Listing Pipeline:** Custom orchestration lifecycle for multimodal asset processing and content generation. Managed end-to-end architecture, from data layer to model observability.
- **Autonomous Support Agents:** Agentic AI workflows integrated with internal knowledge bases to autonomously resolve Tier 1 queries and orchestrate bookings without human intervention.

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Languages

Fluent English (Professional), Hindi (Native), Italian (Beginner)
