Profile

High-agency Forward Deployed Engineer with 3+ years of experience building mission-critical data pipelines, complex API integrations, and robust automated workflows. Proven track record of operating embedded directly alongside cross-functional operational and product teams, translating ambiguous study protocols and requirements into production-grade, audit-ready software. Adept at relational database modeling (PostgreSQL, SQL), backend frameworks (Django/Python, Laravel, TypeScript/Node.js), and deploying human-in-the-loop validation systems that enforce rigorous data accuracy and regulatory compliance.

Core Competencies

- **Forward Deployed Engineering:** Embedded study and trial delivery, technical triage, requirement translation, User Acceptance Testing (UAT), production go-live coordination
- **Data Pipelines & Integrations:** RESTful APIs, Webhooks, ETL data ingestion, multi-source synchronization, schema mapping, relational data integrity, automated edit checks
- **Backend & Database Architecture:** Relational databases (PostgreSQL, MySQL), SQL query optimization, Django/Python, TypeScript, Node.js, Next.js, Laravel
- **Quality, Validation & Compliance:** Automated end-to-end testing (Playwright), human-in-the-loop verification, SOP alignment, audit-ready data artifacts, error-handling & retry logic

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer (Freelance) *Mar 2024 – Present*

- Architected and deployed production backend services and automated data pipelines, operating as an embedded technical lead translating operational requirements into scalable software.
- Built and deployed a flagship human-in-the-loop AI ingestion engine that parses multi-format unstructured sources (PDFs, web forms, spreadsheets) into structured, validated database schemas.
- Led the end-to-end platform migration from legacy systems to a modern relational architecture (Next.js + Laravel/PostgreSQL), mapping data entities and scaling the platform to 4,500+ active users.
- Engineered resilient, bidirectional REST API integrations with external platforms (OfficeRnD, Nexudus), implementing automated sync, robust retry logic, and webhook event processing.
- Implemented comprehensive automated testing suites and end-to-end quality validation protocols (Playwright), maintaining high data accuracy and system reliability.

Urlink **Barcelona, Spain**

Project Manager & AI-Assisted Developer (Freelance) *Apr 2025 – Jul 2025*

- Delivered customized full-stack applications and automated data workflows utilizing PostgreSQL (Supabase) and modern web technologies to handle client-specific business logic.
- Served as the primary technical point of contact, collaborating directly with non-technical stakeholders to scope technical constraints, conduct user acceptance testing, and accelerate delivery.

UltraStrategy.com **France**

Automation Developer (Collaborator) *Dec 2024 – May 2025*

- Designed and deployed multi-format document ingestion pipelines and automated data extraction workflows, enforcing strict data validation and error-free ingestion into target databases.
- Orchestrated automated ETL workflows integrating external APIs and webhooks, standardizing unstructured inputs into queryable relational data structures.

Get2Germany.com **Berlin, Germany**

Lead Developer & Automation Specialist *Jan 2024 – May 2024*

- Developed automated data discovery pipelines and integrated external APIs (Google APIs), optimizing database queries and data ingestion logic for high throughput and reliability.
- Built data validation routines and automated screening workflows to eliminate manual data entry bottlenecks across user registration pipelines.

Clubee.com **Foetz, Luxembourg**

Full-Stack Developer & QA (Freelance) *Sep 2023 – Aug 2024*

- Implemented REST API integrations and custom domain modules, enforcing rigorous unit testing, quality assurance protocols, and strict access controls across core platform features.
- Maintained cross-platform data synchronization and resolved regression defects through structured test suites, ensuring production reliability.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 – Jun 2024*

Minor in Entrepreneurship

Certifications & Technical Skills

- **Technical Stack:** Python, Django Admin, PostgreSQL, SQL, TypeScript, Node.js, Next.js, Laravel, REST APIs, Webhooks, Docker, Git, Playwright, Postman, Supabase.
- **Certifications:** Microsoft Copilot Studio Agent Academy, Microsoft Power Automate, Tray.AI Build Practitioner.
- **Work Authorization & Languages:** European Long Term Residence Permit (Italy; no sponsorship required). English (Fluent C1), Hindi (Native), Italian (Beginner).
