Hiring Team
Grafton Recruitment
Italy

Subject: Application for Forward Deployed Engineer (AI)

Dear Hiring Manager,

I am writing to express my strong interest in the Forward Deployed Engineer position within Grafton Recruitment's AI sector. With a proven track record of designing, deploying, and maintaining LLM-based agents and data pipelines in production, I specialize in translating ambiguous business problems into scalable technical solutions. The prospect of working shoulder-to-shoulder with enterprise clients to solve high-impact challenges aligns perfectly with my background and ambitions.

In my current role as Lead Developer at FlowSpace, I architected and deployed an AI Listing Bot that ingests unstructured brochures (PDFs, websites, images) and leverages Claude and n8n to draft full marketplace listings through a human-in-the-loop system. Owning this project end-to-end required robust system design, complex API integrations, and direct collaboration with stakeholders to ensure the solution delivered tangible business value. Furthermore, I led the migration of a legacy no-code platform to a coded Next.js and Laravel stack, designing the entire data flow and successfully scaling the system from 2,000 to over 4,500 active users.

The core of the Forward Deployed Engineer role—owning projects from first principles to production outcomes—is exactly how I operate. Whether building a CV parsing tool utilizing Eden AI and n8n for UltraStrategy, or engineering CRM and GTM automations that capture and route enterprise leads, I consistently bridge the gap between complex AI capabilities (RAG, prompt engineering, agentic workflows) and real-world customer needs. Using tools like Claude Code, TypeScript, and Python, I quickly prototype, debug, and iterate to achieve production-grade outcomes.

I am based in Venice, hold a European Long Term Residence Permit, and am fully open to remote work or hybrid travel to client sites in Milan or Rome. I am eager to bring my hands-on AI deployment experience and customer-centric engineering approach to Grafton Recruitment's clients.

Thank you for considering my application. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team's success.

Sincerely,

Prabhavit Gupta
