Hiring Team
HCLSoftware
Incubation & Exploration Portfolio

Subject: Application for Forward Deployed Engineer

Dear Hiring Team,

I am writing to express my interest in the Forward Deployed Engineer role within HCLSoftware's Incubation & Exploration portfolio. With HCLSoftware shaping the next wave of enterprise AI through its Agentic AI Builder and Governance Platform, my background in building production-grade AI agents, deploying LLM pipelines, and migrating enterprise platforms makes me a strong fit for translating your products into tailored client solutions.

In my current role as Lead Developer at FlowSpace, I specialize in the exact intersection of AI integration and enterprise problem-solving required for this position. I regularly conduct technical discovery and manage the end-to-end delivery of automated pipelines. Highlights of my relevant experience include:

- **AI/ML Integration:** Architected and deployed an AI Listing Bot that ingests varied unstructured data formats (PDFs, images, websites) and leverages LLMs to draft and publish validated database entries.
- **System Modernization:** Led the platform migration from a legacy no-code stack to a highly scalable Next.js and Laravel architecture, directly supporting user growth from 2,000 to over 4,500 users.
- **Enterprise API Integration:** Built robust data pipelines and REST API integrations linking core platforms with third-party software (OfficeRnD, Nexudus) and CRM systems to automate operations.
- **Client-Facing Diagnostic Support:** Routinely triaged complex production edge cases, managing client relationships and deploying fixes under tight deadlines.

I am deeply passionate about maximizing software ROI for clients and thrive in roles that demand both architectural rigor and strong stakeholder communication. I am eager to bring my expertise in Python, API design, and AI automation to HCLSoftware to help your clients seamlessly integrate cutting-edge Agentic AI solutions into their existing infrastructures.

Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences align with the needs of HCLSoftware.

Kind regards,

Prabhavit Gupta
