Verkada Hiring Team
Verkada
Milan, Italy

Dear Hiring Manager,

I am writing to express my strong interest in the Enterprise Solutions Engineer (South Europe) role at Verkada. With a proven track record of designing and delivering technical integrations across eight European companies and direct experience managing client-facing implementations, I am eager to help Verkada expand its footprint upmarket into Fortune 500 companies across the region.

In my most recent role as Lead Developer at FlowSpace, I owned the product architecture end-to-end, scaling the platform to over 4,500 users. A core part of my responsibility involved acting as a trusted technical advisor—mediating between our internal teams, external agencies, and B2B customers to translate business needs into robust technical solutions. Furthermore, my hands-on experience integrating physical workspace APIs (like OfficeRnD and Nexudus) has given me a deep appreciation for the complexities of modern access control and IoT systems.

Here is how my background aligns with the requirements of the Enterprise Field Solutions Engineer position:

- **Technical Integrations & APIs:** Extensive experience building and troubleshooting REST APIs, webhooks, and complex system integrations, closely mirroring the technical knowledge needed to design Verkada network deployments.
- **Customer Advocacy & Solution Design:** Proven ability to interface directly with clients to overcome technical objections and gather requirements, having successfully led a major platform migration while ensuring zero disruption for live customers.
- **Regional Readiness:** Based in Venice, ready to travel or relocate, and equipped with a deep understanding of the European market having worked with teams in Italy, Spain, and beyond.

Verkada's mission to modernize physical security through privacy-sensitive, AI-powered systems represents one of the most exciting shifts in the IoT landscape. I would welcome the opportunity to bring my hands-on technical expertise, customer-focused approach, and startup agility to your sales engineering team.

Thank you for your time and consideration. I look forward to the possibility of discussing how my skills and experiences can contribute to Verkada's continued growth in South Europe.

Sincerely,

Prabhavit Gupta
