Prabhavit Gupta

+39 351 610 7807 prabhavitg@gmail.com LinkedIn GitHub Venice / Milan, Italy

Career Summary

- Forward Deployed Engineer with 3 years of experience deploying real-time communications, voice AI agents, and API integrations for enterprise customers across Southern Europe.
- Deep technical expertise building low-latency telephony pipelines, WebSockets integrations, Model Context Protocol (MCP) servers, and automated evaluation frameworks.
- Based in Italy (Venice/Milan), fluent in Italian and English, with full permanent EU work authorization (no visa sponsorship required).

Technical Skills

- **Communications AI & Real-Time Systems** : Voice AI, Real-time Audio/Streaming APIs, WebSockets, WebRTC, SIP Telephony Integrations, Speech-to-Text (STT), Text-to-Speech (TTS), Agentic Tool Calling.
- **Software Development** : Python, TypeScript, Node.js, FastAPI, REST APIs, JSON-RPC, Asynchronous I/O.
- **Cloud, Infrastructure & Delivery** : Docker, Linux, CI/CD, Observability & Telemetry, Automated Testing Harnesses.

Professional Experience

FlowSpace *Venice / Milan, Italy*
Forward Deployed & Applied AI Engineer *11/2024 – Present*

- Led customer engineering engagements across Southern Europe, architecting low-latency voice and messaging AI agents for enterprise partners.
- Designed custom Model Context Protocol (MCP) and WebSocket servers in Python and TypeScript, bridging real-time telephony APIs with LLM reasoning loops.
- Built automated evaluation suites to continuously audit speech recognition fidelity, latency budgets, and multi-turn conversational tool accuracy.
- Partnered directly with enterprise engineering leaders to ensure high-availability deployments.

UltraStrategy *Remote, UK/EU*
AI Solutions Engineer *01/2024 – 10/2024*

- Architected and deployed enterprise AI solutions, optimizing token throughput and response latency by 38%.
- Authored technical architecture specifications and API documentation for partner integrations.

Urlink *Milan, Italy*
Full Stack & Automation Engineer *06/2023 – 12/2023*

- Engineered real-time automation microservices and RESTful API integrations handling 100,000+ monthly events.
- Developed automated testing harnesses that reduced regression rates by 50%.

Get2Germany *Remote, Germany*
Software Engineer *08/2022 – 05/2023*

- Built full stack applications and backend microservices using FastAPI and PostgreSQL.

Education & Work Authorization

- **Bachelor of Science in Computer Science & Management** | Universita Ca' Foscari Venezia (2020 – 2023).
- **Work Authorization** : Italian EU Long-Term Residence Permit (*Permesso di Soggiorno UE per Soggiornanti di Lungo Periodo* - permanent resident, unlimited work rights across Italy / EU Remote, zero visa sponsorship needed).
