Summary

I design and build agentic AI systems end to end and ship them into production for real users. At FlowSpace I built orchestration pipelines using n8n, LLM tool use with structured outputs, and evaluation checks that run in production: a document processing agent that takes any format, extracts structured data via Claude and OpenAI APIs, runs source-grounded hallucination checks, and produces clean marketplace listings with a human in the loop. I also built support agents using retrieval-augmented generation and owned prompt engineering and observability across all AI features. I write TypeScript, Node.js and Python, and use Claude Code (MCP, tool use, evals) as my primary development environment.

Skills

- **Agentic AI systems:** designed and shipped multi-step LLM agents in production, n8n workflow orchestration, tool use and structured outputs, prompt engineering, evaluation and guardrail systems, observability (traces, evals), human-in-the-loop review
- **LLM & AI:** LLM APIs (OpenAI, Claude) daily in production, retrieval-augmented generation, hallucination detection, Claude Code (MCP, tool use, evals) as primary dev environment
- **Languages & frameworks:** TypeScript, JavaScript, Node.js, Python, Next.js, React, Laravel (PHP), PostgreSQL, Supabase
- **Stakeholder work:** translating creative and product requirements into working AI systems, owning problems end to end, shipping and iterating on real-world feedback

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
