Summary

I test web applications, APIs and data-connected workflows and turn failures into clear fixes. At FlowSpace I owned issues across a live marketplace, verified booking, CRM and AI integrations, and resolved production problems end to end with customers and engineers. At Clubee I ran unit testing and QA while shipping API-connected features. I use TypeScript, Python, Playwright and structured regression checks across frontend, API and workflow testing.

Skills

- **Quality engineering:** Playwright, web and API testing, unit testing, regression strategy, exploratory testing, bug isolation and clear reporting

- **Data & integrations:** REST APIs, webhooks, PostgreSQL, Supabase, third-party integrations and validation of data-driven behavior
- **Delivery workflows:** Git, CI/CD, production troubleshooting, release verification, cross-functional QA and customer issue resolution

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
