Prabhavit Gupta

Venice, Italy
+39 351 610 7807 • prabhavitg@gmail.com • LinkedIn, GitHub

Pragmatic, product-minded software engineering generalist experienced in building from zero and deploying intelligent systems in fast-moving environments. Proven track record of architecting end-to-end LLM pipelines, orchestrating multi-step AI agents, and embedding directly with clients to translate complex requirements into robust production software. Strong executor across the stack (TypeScript, Python, SQL) with a focus on rapid prototyping, reliable API integrations, and delivering concrete impact alongside founding teams.

Core Competencies

- **Forward Deployed Engineering**: Client-facing deployment, translating complex technical systems to stakeholders, prototyping in ambiguous environments, rapid execution, human-in-the-loop review systems.
- **AI & LLM Pipelines**: Anthropic API, OpenAI API, multi-step agent orchestration, Model Context Protocol (MCP), tool use, structured JSON parsing, RAG, prompt engineering, automated ingestion workflows.
- **Full-Stack & Systems**: TypeScript, Python, Node.js, Next.js, React, REST/GraphQL APIs, low-latency API integration, automated testing, retry logic, resilient system architecture.
- **Data & Infrastructure**: PostgreSQL, Supabase, MySQL, data schema mapping, zero-downtime migrations, Git, secure and isolated deployment environments.

Professional Experience

FlowSpace.co — **London, UK (Remote)**
Full-Stack & AI Engineer (Freelance) — *Mar 2024 - Aug 2026*

- Built an end-to-end AI document extraction pipeline orchestrating multi-step LLM agents with tool use, structured output validation, and RAG to ingest client data safely into production databases.
- Designed human-in-the-loop approval workflows with strict schema validation, enabling non-technical stakeholders to review and approve AI outputs securely and efficiently.
- Architected and maintained enterprise API integrations across booking and CRM pipelines, implementing robust webhook handling, retry logic, and rate limiting for high reliability.
- Led the platform migration off a legacy stack onto a coded Next.js and Laravel stack, mapping data schemas and executing zero-downtime cutover while scaling the user base from 2,000 to 4,500+ users.

Client Engagements — **Remote**
AI Solutions & Forward Deployment Projects — *Jan 2024 - Jul 2025*

- **Urlink** (Apr 2025 - Jul 2025): Worked directly with client leadership to map operational requirements, build platform logic from zero, and deploy automated workflows using Next.js and Supabase.
- **UltraStrategy** (Dec 2024 - May 2025): Engineered an LLM-powered data extraction pipeline and document parsing tool with n8n and Eden AI, prioritizing speed and adaptability in a fast-moving environment.
- **Get2Germany.com** (Jan 2024 - May 2024): Integrated Google APIs and optimized database queries, simplifying complex technical architectures into highly functional end-user tools.

Education

Ca' Foscari University of Venice — **Venice, Italy**
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) — *Oct 2020 - Jun 2024*

Certifications & Additional Information

- **Certifications**: Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, Microsoft Power Automate, Tray.AI Build Practitioner.
- **Work Authorization**: EU Long Term Residence Permit (Italy). Open to relocation (Paris/Warsaw) and on-site deployments.
- **Languages**: English (Fluent/C1), Hindi (Native), Italian (Beginner).
