Prabhavit Gupta

Application Integration Developer: Python APIs, System Automations & Cloud Workflows

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Application Integration Developer and Software Engineer with 3 years of hands-on experience designing, developing, and maintaining production API integrations, automated data synchronization pipelines, and system automations across European technology teams. Expert in connecting disparate business applications and databases via robust REST APIs, webhook architectures, and event-driven workflows with strict error handling, retries, and rate-limit governance. Proven track record deploying containerized workloads, automating onboarding and operational processes, and engineering end-to-end automated test suites. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without sponsorship). Immediately available.

Technical Expertise

- **Integration & Automation Engineering:** REST APIs, Webhook listeners, Event-driven workflows, Idempotent data synchronization, Pagination, Rate-limit management, n8n orchestration, Error handling & alerting.
- **Core Languages & Frameworks:** Python, TypeScript, JavaScript, Node.js, SQL, Asynchronous programming, Strict data modeling & schema validation.
- **Databases & Cloud Services:** PostgreSQL, Supabase, Relational schema design, Docker containerization, Azure cloud services, Git version control, CI/CD pipelines.
- **Testing & Reliability:** Automated end-to-end integration testing (Playwright), API validation with Postman, Log diagnostics, SLA-focused monitoring.
- **AI-Assisted Development:** Daily use of Claude Code and modern AI development tooling for high-speed prototyping, refactoring, and code validation.
- **Languages & Work Authorization:** Hindi (Native), English (C1 Professional), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted EU work authorization; no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Directed full-stack integration and automation architecture, connecting internal services with enterprise external systems and business tools to eliminate manual administrative overhead.
- Engineered high-reliability REST API integrations between operational databases and partner management platforms (OfficeRnD, Nexudus), implementing robust webhook listeners and exception-handling logic.
- Solved complex multi-system data reconciliation challenges through idempotent synchronization, automated retries, and data audit logs across active customer records.
- Built automated data ingestion and transformation pipelines that parsed heterogeneous inputs into structured relational database schemas, populating 900+ verified partner records.
- Designed and executed comprehensive end-to-end test suites using Playwright, verifying automated data flows and preventing regressions across critical business paths.
- Implemented system workflow automations for user onboarding, status synchronization, and access management, maintaining 99.9% service availability.
- Served as the primary technical escalation point for integration troubleshooting, diagnosing production sync discrepancies via structured logs and automated monitors.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical delivery of web application integration features, defining clear API contracts, database schemas, and service-to-service communication protocols.
- Developed and maintained automated backend pipelines connecting third-party services with relational databases, ensuring strict payload validation and idempotent processing.
- Configured automated continuous integration (CI/CD) pipelines and quality checks to ensure seamless code deployment and minimize production incidents.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed and deployed bespoke API integrations, automated workflows, and data pipelines for European SME clients using Python, TypeScript, and Playwright.
- Collaborated directly with business stakeholders to audit manual processes, translating complex operational bottlenecks into automated, cloud-hosted software workflows.
- Implemented webhook handlers and data transformation scripts that replaced legacy manual spreadsheets with real-time database synchronizations.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
