Application: Operations Automation Officer, Sofia Stars (Sofia, Bulgaria)

Dear Sofia Stars Hiring Team,

I am applying for the Operations Automation Officer role. Mapping manual, repetitive work and turning it into reliable automated workflows with n8n and code is the core of what I have done for the past three years.

At FlowSpace I built n8n workflows for lead routing, data sync and support queries, integrated the OfficeRnD and Nexudus APIs end to end (OAuth2, webhooks, location sync, booking automation), and wrote Python scripts for automation and AI API calls, including a pipeline with Claude and OpenAI extraction and human review that added 900+ listings, and a listing sync pipeline across 9 operators with staged approval and dry-run safety. At UltraStrategy I built a CV parsing tool with n8n and Eden AI, and at Get2Germany I integrated Google APIs for platform tracking. I work in TypeScript and Python, use Google Sheets in my workflows, and have worked with PostgreSQL, MySQL and SQLite.

On the gaps: I use GitHub rather than GitLab, I have not used GraphQL, Google Apps Script or the Zendesk API, and my JavaScript is TypeScript-based. My degree is in Philosophy, International Studies and Economics, not computer science. I do not speak Bulgarian; I work in English (C1).

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Sofia. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
