Application: RPA Developer, Deutsche Telekom Services Europe Romania (Timisoara)

Dear Hiring Team,

I am applying for the RPA Developer role in Timisoara. For about three years I have built automations that take manual work off business teams, and I would like to do that on an enterprise RPA platform.

At FlowSpace I built n8n automations and CRM lead-capture integration, integrated the OfficeRnD and Nexudus APIs with OAuth and webhooks, and built support agents that answer against live platform data and escalate to a person on low confidence. I use Playwright for browser automation, write Python at working level, and work with PostgreSQL and MySQL. I documented product and business logic with the developer team and handed work over to the people who run it. I also hold the Microsoft Power Automate and Tray.AI certifications listed on my CV.

On the gaps, plainly: I have no hands-on experience with Blue Prism, UiPath or Automation Anywhere, so the 2-3 years of RPA tool experience in the posting is something I do not have; I would be learning the tool on the job. I have not used VBA, written SDDs for RPA, or run attended and unattended bots. I do not speak German. My degree is a Bachelor's in Philosophy, International Studies and Economics.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Timisoara. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
