Application: Integration Engineer, Norrin

Dear Hiring Team,

I am applying for the Integration Engineer role in Helsinki. Building API integrations, securing them with OAuth and working with the customer on what they need is the work I have done for about three years.

At FlowSpace I integrated the OfficeRnD and Nexudus APIs with REST, OAuth and webhooks, and led a live migration off a legacy stack to a coded Next.js and Laravel product (mapped the data model, chose the migration path per entity, API or CSV, and drove the cutover) while the platform grew from 2,000 to 4,500+ users. I troubleshoot with Postman, documented product and business logic with the developer team, and built support agents that answer against live platform data and escalate to a person on low confidence.

On the gaps, plainly: I do not speak Finnish; my working languages are English (professional) and Hindi, with Italian at beginner level. I have not worked with Azure Integration Services (Logic Apps, Functions, API Management, Service Bus, Event Hubs), C# or .NET, or Terraform, and I hold no Azure certifications. My integration work is in TypeScript, Node.js and Laravel, with Python at working level. My degree is a Bachelor's in Philosophy, International Studies and Economics.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Helsinki for the hybrid role. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
