Application: Workday Integration Specialist, Telia

Dear Hiring Team,

I am applying for the Workday Integration Specialist role in Vilnius. Connecting systems through their APIs, mapping the data between them and documenting it so someone else can run it is the work I have done for about three years.

At FlowSpace I integrated the OfficeRnD and Nexudus APIs with REST, OAuth and webhooks, and led a live migration off a legacy stack to a coded Next.js and Laravel product (mapped the data model, chose the migration path per entity, API or CSV, and drove the cutover) while the platform grew from 2,000 to 4,500+ users. I troubleshoot integrations with Postman, document product and business logic with the developer team, and have built workflows on n8n and Tray.AI (Build Practitioner certified).

On the gaps, plainly: I have not worked with Workday and have not used Orchestrate, EIB, Studio, Core Connectors or Workday Web Services. I have not worked with SOAP, XML or XSLT, SFTP or certificate-based transfers, or Java, and I have not worked in SAFe. My integration experience is REST, JSON, OAuth and webhooks on other platforms, with TypeScript and Python at working level. My degree is a Bachelor's in Philosophy, International Studies and Economics.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Vilnius. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
