Prabhavit Gupta

Forward Deployed Engineer: Full-Stack Systems, API Integrations, Client Architecture & AI Solutions

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Relocating to Madrid, Spain)

Summary

Forward Deployed Engineer with 3 years of hands-on software development experience bridging client-facing technical leadership and core platform engineering. Proven record partnering directly with enterprise technical teams, CTOs, and developers to untangle complex operational workflows, build hardened integration proofs-of-concept, and ship production software that scales. Technical foundation spanning TypeScript, Node.js, React, Next.js, and Python, with specialized expertise in API architecture, webhook listeners, relational data integrity (PostgreSQL), and AI-accelerated development (Claude Code, Cursor). Pragmatic builder experienced with Spanish tech ecosystems (prior engineering project management at Urlink in Barcelona) who treats AI as an operational force multiplier for code quality and velocity. Holder of EU Long-Term Residence Permit (permanent unrestricted EU work authorization in Spain without visa sponsorship); based in Venice, Italy and ready for immediate relocation to Madrid.

Technical Expertise

- **Forward Deployed & Client Engineering:** Technical discovery, pre-sales and post-sales technical guidance, scoping enterprise integrations, live architectural demos, technical documentation, client handover.
- **Full-Stack & API Architecture:** TypeScript, JavaScript, Node.js, React, Next.js, Python (FastAPI), RESTful API design, webhook synchronization pipelines, automated contract testing with Playwright.
- **Data Modeling & Distributed Foundations:** PostgreSQL, schema design & migrations, Supabase, Redis, cloud architectures (AWS/GCP), Docker containerization, CI/CD automation with GitHub Actions.
- **Applied AI & Developer Acceleration:** Power user of AI-native engineering tools (Claude Code, Cursor); schema-enforced tool calling, context engineering, automated evaluation pipelines, production transcript audits.
- **Quality & System Reliability:** Continuous delivery, end-to-end regression suites, structured error logging, retry queues, API rate-limiting handling, secure handling of sensitive financial records.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted work authorization in Spain and EU, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support agent runtime on a live platform serving 4,500+ active users, automating customer inquiries across pricing, venue inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and fallback escalation logic that routed complex inquiries to staff.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and eliminating hallucinated answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining rapid response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.
- Built automated data ingestion and transformation pipelines parsing and validating unstructured partner listings, expanding platform inventory to over 900 locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Architected core web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic for client-facing features.
- Implemented automated validation and synchronization pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring relational data integrity.
- Integrated automated CI/CD workflows and regression checks to accelerate feature delivery across distributed development environments.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed and delivered bespoke AI automation workflows, web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, fragmented business operations into automated software solutions with structured logging, retry queues, and reliable recovery logic.
- Engineered webhook listeners and real-time synchronization pipelines across CRM platforms, operational tools, and relational datastores.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
