Prabhavit Gupta

Senior Applied AI Engineer: Coding Agents, Tool Use & Agentic Orchestration

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Applied AI engineer with 3 years of hands-on experience designing, shipping, and evaluating production LLM agents, tool-calling pipelines, and autonomous workflows. At FlowSpace, architected multi-step agents leveraging LLM tool use and live API function calling with confidence scoring and human escalation, built automated document parsing systems drafting 900+ structured listings, and directed agentic developer workflows utilizing Claude Code, Cursor, TypeScript, and working-level Python. Deep practical focus on agent loops, prompt engineering, structured JSON outputs, context management, and benchmarking across OpenAI, Anthropic, and Google models for quality, latency, and token efficiency. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without sponsorship). Immediately available; comfortable with Pacific Time overlap.

Technical Expertise

- **Agentic Systems & Coding Agents:** Autonomous agent loops, Tool calling, Function calling, Structured JSON schemas, Multi-step reasoning, Model Context Protocol (MCP), Context compression.
- **LLM Evaluation & Providers:** Anthropic (Claude 3.5 Sonnet / Haiku), OpenAI (GPT-4o), Google Gemini, Model routing, Prompt optimization, Evals and failure analysis, Token and cost observability.
- **Software Engineering:** TypeScript, JavaScript, Node.js, Working-level Python, RESTful API architecture, WebSockets, PostgreSQL, Supabase, Docker, Git.
- **Automation & Workflows:** n8n, Playwright, CI/CD verification pipelines, Idempotent webhook handling, Cloud infrastructure integrations.
- **Languages & Authorization:** Hindi (Native), English (C1 Professional), Italian (Beginner). EU Long Term Residence Permit (No EU sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Architected and shipped production customer support AI agents using LLM tool calling and live REST API function calling to query platform availability and execute bookings, with confidence thresholds and fallback routing.
- Built an automated knowledge ingestion and listing bot with human-in-the-loop review: parsed heterogeneous documents (PDFs, spreadsheets, web pages) into structured database records using LLM extraction prompts, creating 900+ verified listings.
- Engineered agentic developer workflows and tooling using Claude Code, TypeScript, and automated testing, accelerating feature delivery cycles across the engineering team.
- Directed platform architecture migration off a legacy stack to a modern Next.js, TypeScript, and Laravel backend, establishing reliable schema contracts and API specifications.
- Integrated external REST APIs (OfficeRnD, Nexudus, Stripe) with idempotent event handling and automated webhook reconciliation.
- Implemented token tracking, prompt versioning, and end-to-end regression testing with Playwright to maintain high output fidelity across production agent runs.
- Scaled platform user base from 2,000 to 4,500+ active users through iterative product engineering and resilient backend automations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical delivery of AI-assisted web applications, coordinating API contracts, database schemas, and external integrations.
- Evaluated commercial LLM APIs (OpenAI, Anthropic) across task types, optimizing prompt structures and model selection for latency and output consistency.
- Implemented automated CI/CD checks and test suites, ensuring clean code releases and minimal deployment regressions.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Developed custom AI automations, agent prototypes, and data extraction pipelines for European SME clients using n8n, Playwright, and LLM APIs.
- Implemented idempotent webhook listeners and CRM data synchronization flows, replacing error-prone manual administrative processes.
- Built prototype RAG inquiry assistants integrated with company documentation for rapid customer response triage.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- In-depth focus on formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
