Dear Deliverect Hiring Team,

I am writing to express my strong enthusiasm for the Implementation Consultant position at Deliverect. As an API-first commerce platform revolutionizing how restaurants and retailers manage ordering channels, Deliverect bridges core operational complexity with seamless digital experiences. Guiding enterprise and mid-market customers through complex technical implementations, third-party integrations, and platform adoption directly matches my hands-on background.

Over the past three years as Lead Developer at FlowSpace and in client-facing technical consulting, I have specialized in architecting and deploying reliable third-party API integrations, webhook architectures, and automated workflow solutions. I led end-to-end partner onboarding for B2B venues, integrating complex booking and payment APIs (OfficeRnD, Nexudus, Stripe) with idempotent event reconciliation to ensure zero transaction loss. Furthermore, I directed our core platform modernization from a legacy architecture to Next.js and Laravel, managing partner communications, technical discovery, and comprehensive regression testing with zero disruption for over 4,500 active users.

My background aligns directly with the priorities of Deliverect's Consulting & Implementation team:

- **Technical Implementation & Client Guidance:** Proven ability to act as a trusted technical advisor, translating complex client business requirements into scalable integration configurations, setting realistic project timelines, and leading hands-on training sessions.
- **API & Webhook Proficiency:** Strong diagnostic command of RESTful APIs, HTTP protocols, webhook listener architecture, idempotent event processing, and tools like Postman and Swagger to trace and resolve integration anomalies.
- **Troubleshooting & Escalation Leadership:** Adept at dissecting edge-case integration failures, pinpointing root causes across network payloads and backend logic, and collaborating closely with engineering teams for swift resolution.
- **Client Communication & Empathy:** High-ownership communicator comfortable presenting to both non-technical business managers and technical developers, ensuring smooth change management and high customer satisfaction.

Based in Venice, Italy, I hold an EU Long Term Residence Permit providing permanent, unrestricted right to work across Italy and the EU without requiring visa sponsorship. I am enthusiastic about working in a hybrid arrangement at your Milan office or remotely, and I am available immediately.

I would welcome the opportunity to discuss how my technical implementation experience can contribute to Deliverect's client success and continued European expansion.

Kind regards,

Prabhavit Gupta
