Prabhavit Gupta

Implementation Consultant: API Integrations, Client Onboarding & Technical Solutions

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Technical Implementation Consultant and Solutions Engineer with 3 years of hands-on experience guiding clients through complex SaaS onboarding, third-party API integrations, and resilient workflow implementations. At FlowSpace, led platform technical integrations with external platforms (OfficeRnD, Nexudus, Stripe), architected idempotent webhook listeners, and directed client-facing workflow delivery that scaled active users from 2,000 to 4,500+. Exceptional communicator adept at bridging technical architecture with business operational needs, diagnosing API discrepancies, and delivering customer training. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without sponsorship). Immediately available.

Technical Expertise

- **Integration & API Engineering:** RESTful APIs, Webhook architecture, Idempotent event processing, JSON payloads, HTTP status diagnostics, Postman API testing, Swagger/OpenAPI specifications.
- **Client Implementation & Consulting:** Solution scoping, Technical onboarding, Client workflow mapping, System configuration, Customer training, Incident investigation, Escalation management.
- **Software Development & Automation:** TypeScript, JavaScript (Node.js), Laravel, n8n, Playwright automated testing, PostgreSQL, Supabase, Git/GitHub, Docker.
- **Languages & Authorization:** Hindi (Native), English (C1 Professional), Italian (Beginner). European Long Term Residence Permit (No EU sponsorship required).

Experience

FlowSpace.co *Mar 2024 - Aug 2026*
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Led end-to-end technical implementation and onboarding for B2B venue partners, managing client requirements, integration timelines, and platform configuration.
- Integrated external REST APIs (OfficeRnD, Nexudus, Stripe) with idempotent event handling and automated webhook reconciliation, eliminating manual transaction overhead.
- Directed platform architecture migration off a legacy stack to a modern Next.js, TypeScript, and Laravel backend, coordinating an external agency and internal team with zero customer downtime.
- Architected and deployed production customer support AI agents using LLM tool calling and live REST API function calling to query platform availability and execute bookings.
- Built an automated knowledge ingestion and listing bot with human-in-the-loop review: parsed heterogeneous documents (PDFs, spreadsheets, web pages) into structured database records.
- Implemented token tracking, prompt versioning, and end-to-end regression testing with Playwright to maintain high reliability across production runs.
- Scaled platform user base from 2,000 to 4,500+ active users through iterative product engineering and resilient backend automations.

Urlink *Apr 2025 - Jul 2025*
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Managed client-facing delivery of AI-assisted web applications, coordinating API contracts, database schemas, and partner integrations.
- Evaluated commercial LLM APIs (OpenAI, Anthropic) across task types, optimizing prompt structures and model selection for latency and output consistency.
- Implemented automated CI/CD checks and test suites, ensuring clean code releases and minimal deployment regressions.

Independent Technical Consultant *Aug 2023 - Feb 2024*
AI Solutions & Automation Engineer *Venice, Italy*

- Consulted European SME clients on SaaS tool adoption, custom automation pipelines, and third-party API connectivity using n8n and REST webhooks.

- Implemented idempotent webhook listeners and CRM data synchronization flows, replacing error-prone manual administrative processes.
- Built automated verification scripts with Playwright and Postman for regression testing and continuous data validation.

Education

Ca' Foscari University of Venice *2020 - 2024*
BA in Philosophy, International and Economic Studies *Venice, Italy*

- Rigorous focus on formal logic, statistical reasoning, decision theory, and analytical problem-solving applied directly to software systems and algorithmic workflows.
