Prabhavit Gupta

Forward Deployed Engineer: AI Solutions, Integrations & Key Account Deployments

+39 349 718 1904 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU / Remote / Relocation to Berlin)

Summary

Forward Deployed AI & Solutions Engineer with 3 years of hands-on experience deploying client-facing AI agent architectures, mission-critical API integrations, and enterprise automation pipelines. Proven record working directly with enterprise stakeholders from discovery and solution design to production deployment—translating complex business workflows into robust AI agents with schema-enforced actions, deterministic guardrails, and real-time observability. Specialized in building custom Model Context Protocol (MCP) servers, webhook synchronization layers, and CRM/telephony connector bridges across REST and GraphQL APIs. Experienced driving adoption within key customer accounts by demonstrating rapid time-to-first-value on initial AI deployments and systematically expanding into multi-stage operational workflows. Holder of an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across all member states without sponsorship); based in Venice, Italy and ready for hybrid/relocation to Berlin.

Technical Expertise

- **Forward Deployed Engineering:** Customer discovery, translating operational requirements into technical designs, live POC demos, client onboarding, expansion roadmapping, cross-functional stakeholder management.
- **AI Agent Systems & Architecture:** MCP (Model Context Protocol) servers, agent tooling, prompt engineering, intent routing, schema validation, guardrails, fallback escalation logic, evaluation over production transcripts.
- **API & Integration Engineering:** RESTful APIs, GraphQL, webhooks, JSON schemas, authentication patterns (OAuth2, API keys), CRM synchronization (HubSpot, Salesforce), iPaaS/orchestration (n8n, Make).
- **Full-Stack & Backend Engineering:** TypeScript, Python, Node.js, FastAPI, Next.js, PostgreSQL, Supabase, Redis, structured data modeling, ETL data pipelines, asynchronous message queues.
- **Reliability, Testing & DevOps:** Automated end-to-end testing with Playwright, Docker, CI/CD pipelines, logging and trace observability, error monitoring, incident triage.
- **Languages & Work Rights:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (unrestricted work authorization in Germany and across EU, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected and deployed the production customer support and workflow AI agent runtime serving 4,500+ active enterprise users, automating high-touch inquiries across pricing, venue inventory, and multi-location bookings.
- Grounded AI agent actions against live operational datastores and third-party partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas, deterministic validation, and human-in-the-loop escalation paths.
- Designed and rolled out automated evaluation pipelines analyzing real client interaction logs and execution traces to identify failure modes, tune system prompts, and eliminate hallucinated responses.
- Optimized agent response latency and token economics across foundation model providers, reducing monthly API expenditure while improving user response times.
- Built resilient webhook listeners and data synchronization pipelines connecting platform datastores with external CRM systems and scheduling tools, maintaining 99.9% uptime.
- Built automated end-to-end integration and regression suites using Playwright, ensuring zero deployment downtime across customer-facing booking and communication workflows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and microservices stack, accommodating a 125% increase in active user volume.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Led discovery and technical delivery for client web solutions, scoping system integrations, defining API contracts, and orchestrating multi-stakeholder roadmaps.
- Engineered automated data validation and connector pipelines connecting third-party platforms to PostgreSQL datastores, eliminating manual entry and ensuring strict data integrity.

- Standardized CI/CD deployment pipelines and automated testing harnesses, cutting release cycle times for client deliverables.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Built bespoke AI automation workflows, CRM integrations, and data extraction pipelines for European SME clients using Python, TypeScript, and modern orchestration tools.
- Replaced fragmented, manual spreadsheet operations with robust event-driven integrations featuring automatic retry queues, dead-letter alerts, and structured audit logs.
- Conducted hands-on technical onboarding, client stakeholder demos, and workflow training, achieving high user adoption across newly automated operational processes.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
