Application: Revenue Operations Engineer, AI & Automation, Superchat

Dear Hiring Team,

I am applying for the Revenue Operations Engineer role because it matches the work I have done for the last three years: building automations, integrations and LLM-powered tools that make go-to-market and support teams faster.

At FlowSpace I built CRM and GTM automations in n8n for lead capture, enrichment, routing and outbound, connected tools through APIs and webhooks (including OfficeRnD and Nexudus), and shipped support agents that answer customer queries against live data and escalate to a person when confidence is low. I also built an LLM listing pipeline with human review that drafted 900+ listings. In each case I worked from the business problem to a working, documented solution that other people could run.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), am open to working from the Berlin office, and am available immediately. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
