Prabhavit Gupta

Forward Deployed Engineer (EMEA) | AI Developer Cloud, Agentic Systems, Python & TypeScript

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Timezone | EU Permanent Resident | Full Remote EMEA)

Summary

Forward Deployed Engineer and Applied AI Systems Builder with 3 years of commercial experience partnering directly with enterprise developers and technical clients to build, ship, and scale production AI solutions. Fluent in Python and TypeScript, with hands-on depth in agentic workflows (LangGraph, autonomous tool execution), high-throughput LLM inference, Docker containerization, and Linux runtime troubleshooting. Proven ability to meet clients post-sale, understand complex architectural requirements, rapidly prototype working integrations in days rather than quarters, and channel critical field intel back to product and core engineering teams. Based in Venice (CET timezone), unrestricted EU permanent resident.

Experience

FlowSpace.co • *Lead Forward Deployed Engineer & AI Systems Architect (Freelance)* — Mar 2024 - Aug 2026 • London, UK (remote)

- Acted as the primary field engineer for post-sale enterprise deployments, interfacing directly with client engineering leads to spec, build, and ship custom AI systems into production.
- Built rapid working prototypes and production agentic pipelines using Python, TypeScript, and FastAPI, integrating dynamic tool execution loops, context retrieval, and structured JSON outputs.
- Engineered high-throughput inference wrappers and client workarounds bridging developer platform APIs with complex legacy client databases and cloud services.
- Channeled frontline customer patterns and failure modes back to core platform engineering, accelerating SDK stabilization and feature rollout across the client base.
- Hardened client deployments using Docker, Linux performance profiling, and automated evaluation suites to guarantee sub-second response times and 99.9% uptime.
- *Technologies: Python 3.12, TypeScript, FastAPI, LangGraph, LLM Inference, Docker, Linux, AWS, PostgreSQL, Git*

Urlink • *Forward Deployed Software Engineer (Freelance)* — Apr 2025 - Jul 2025 • Barcelona, Spain (remote)

- Collaborated with external engineering teams to integrate custom data pipelines and semantic search APIs into their production infrastructure.
- Developed custom TypeScript and Python connectors, validating schema compliance with Pydantic and eliminating ingestion errors across heterogeneous partner systems.
- Conducted hands-on troubleshooting of Docker containers and network timeouts in client cloud staging environments.
- *Technologies: Python, TypeScript, REST APIs, Docker, PostgreSQL, Linux, Git*

Independent Technical Consultant • *AI Solutions Engineer & Integration Consultant* — Sep 2023 - Mar 2024 • Venice, Italy

- Delivered tailored agentic AI solutions, developer integrations, and automated RAG pipelines for mid-market European clients.
- Sat directly with client stakeholders to diagnose business bottlenecks and demonstrate live working implementations during weekly working sessions.
- Authored technical architecture specs, integration guides, and API documentation for seamless client engineering handoff.
- *Technologies: Python, LangChain, OpenAI APIs, Vector DB, FastAPI, Linux, Git*

Tractionboard.co • *Full-Stack Automation Developer (Intern)* — Aug 2023 - Oct 2023 • Utrecht, Netherlands (remote)

- Engineered automated API integrations, data transformations, and webhooks for SaaS platform clients.
- *Technologies: Python, JavaScript/TypeScript, REST APIs, Git*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies and Economics (Minor in Entrepreneurship)* — Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft: Introduction to building AI agents • Microsoft Copilot Studio Agent Academy • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work Authorization & Location:** Unrestricted EU Permanent Resident based in Venice, Italy (CET timezone, full remote EMEA ready).
- **Languages:** English (Fluent C1 professional), Italian (Working proficiency), Hindi (Native), Spanish (Conversational).
- **Core Mindset:** Extreme bias to action, curious problem-solver, customer-first empathy, bridges sales promises with production engineering reality.

Core Skills

- **Customer-Facing Engineering:** Forward Deployed Engineering, Technical Scoping, Rapid Prototyping, Unblocking Enterprise Clients, Product Feedback Loops.
- **Languages & Frameworks:** Python 3.12, TypeScript / Node.js, FastAPI, REST APIs, WebSockets, Asyncio, Pydantic, SQL.
- **AI & Agentic Systems:** Agentic AI, LangGraph, LLM Inference Optimization, Tool Calling, Structured Outputs, RAG, Evals.
- **Systems & Infrastructure:** Docker, Linux CLI / Shell Troubleshooting, Cloud Platforms (AWS, GCP), CI/CD, Git.
