Prabhavit Gupta

Applied AI Engineer: LLM Systems, Context Design, Structured Outputs & Orchestration

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Applied AI and software engineer with hands-on experience building production LLM applications, context design frameworks, structured output pipelines, and multi-service agent integrations. At FlowSpace, engineered autonomous document processing systems with human-in-the-loop validation (900+ assets drafted), automated customer support agents operating against live backend data, and multi-service API workflows with automated retries and error recovery. Experienced with PostgreSQL schema design, indexing, migrations, Docker containers, Streamlit interfaces, and OpenTelemetry observability. Based in the EU (Venice, Italy) with unrestricted European work authorization; available immediately.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), no sponsorship needed in the EU. Available immediately.

- **Languages:** Hindi (native), English (professional), Italian (beginner).

Core Skills

- **LLM Systems & Orchestration:** Context design, structured outputs, prompt engineering, agent orchestration (LangChain, LlamaIndex), RAG, human-in-the-loop review, automated retry and failure recovery
- **Backend & Data Infrastructure:** Python (asyncio), REST APIs, WebSockets, PostgreSQL (schema design, indexing, migrations), Supabase, Docker, Docker Compose, multi-service contract design
- **Evaluations & Observability:** LLM evaluation frameworks, regression detection, OpenTelemetry tracing, Claude and OpenAI APIs, Streamlit interfaces, Claude Code, Cursor, Git/GitHub
- **Workflow Automation & Testing:** n8n orchestration, Playwright end-to-end testing, webhook pipelines, rate limiting, production reliability standards
