Application: Senior Automation Specialist, tem

Dear Hiring Team,

I am applying for the Senior Automation Specialist role. Building automation that decides what to do and hands off to a person when it should, rather than just moving data around, is the work I have done for the last three years.

At FlowSpace I built support agents that route on business logic and escalate to a person on low confidence, an LLM ingestion pipeline with human review and QA that drafted 900+ listings, and CRM and GTM automations in n8n with REST API integrations. I use Claude Code and Claude agents daily, write TypeScript and Python, and work directly with non-technical teams to map their process before building. My quality checks so far have been manual QA, human review and confidence thresholds rather than a formal precision and recall harness, and I have not worked on AWS. I would like to build that discipline in a team that runs it seriously.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
