Prabhavit Gupta

AI Applied Software Engineer | TypeScript, Angular, Full-Stack & Agentic Delivery

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Madrid Relocation Ready | Immediate Availability)

Executive Summary

- **AI-Empowered Full-Stack Engineering:** T-shaped software engineer with 3 years commercial experience building responsive web applications and backend microservices while leveraging modern AI-assisted engineering workflows (Cursor, Claude Code, agentic automation) to 3x delivery speed and maintain clean architectural standards.
- **Modern Web Architecture (TypeScript, Angular, RxJS):** Strong practical proficiency building modular component hierarchies in TypeScript and Angular, managing reactive state flows with RxJS, and integrating resilient REST APIs and WebSocket streams for digital banking and financial workflows.
- **Quality, Reliability & End-to-End Ownership:** Rigorous engineering discipline across the entire SDLC: automated unit testing, end-to-end integration test suites, web accessibility (a11y), Docker containerization, and GitHub Actions CI/CD deployment pipelines.

Technical Skills & Core Competencies

- **Frontend Engineering:** TypeScript, Angular, JavaScript (ES6+), RxJS, HTML5, SASS/CSS, Component Architecture, Responsive Design, Web Accessibility (a11y).
- **AI-Assisted Workflows:** Claude Code, Cursor, LLM-Driven Refactoring, Agentic Code Generation, Prompt Engineering for Code Synthesis, Automated Test Generation.
- **Backend & Microservices:** Node.js, Python (FastAPI, AsyncIO), RESTful APIs, WebSockets, Schema Validation (Zod, Pydantic), Microservices Architecture.
- **Databases & DevOps:** PostgreSQL, Redis Caching, Docker, Git, GitHub Actions CI/CD, Agile Scrum Sprints.
- **Collaboration & Communication:** Extreme Ownership, Autonomous Problem Solving, Clean Code Documentation, Fluent Professional English (C1).

Professional Experience

AI Applied Software Engineer & Consultant • *Independent / AI Product Engineering Consultancy*
2024 – Present • Venice, IT (Remote Europe)

- Engineered high-performance web applications and automated microservices for European clients, utilizing AI-assisted developer workflows to accelerate sprint velocity.
- Built modular TypeScript and Angular user interfaces, integrating reactive data streams with RxJS and standardizing responsive layout patterns.
- Integrated backend REST endpoints and external transactional services with defensive input validation schemas, error boundary logging, and resilient retry logic.
- Formulated end-to-end automated testing pipelines, leveraging AI tooling to author high-coverage unit tests and maintain zero-regression deployments in GitHub Actions.
- Designed semantic caching layers using Redis and PostgreSQL, minimizing redundant backend computational overhead and achieving sub-second UI response times.
- Collaborated with multidisciplinary Scrum squads (Product Managers, UX Designers, QA) to ship incremental feature milestones on predictable sprint cadence.

Full-Stack Software Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Developed web platform interfaces and asynchronous background processors using TypeScript, Angular, and Python FastAPI microservices.
- Refactored legacy UI components into reusable, reactive modules with RxJS, improving cross-browser rendering speeds and accessibility adherence.
- Established automated CI/CD gating with GitHub Actions, enforcing automated linting, test validation, and container builds via Docker.
- Partnered with product stakeholders to translate analytical user requirements into intuitive, reliable customer-facing digital features.

Key Engineering Projects

- **AI-Accelerated Financial Analytics Dashboard (TypeScript + Angular + RxJS):** Developed a reactive financial analytics interface featuring live data subscriptions, modular widget architecture, and automated end-to-end test suites.
- **Enterprise Microservice Connector Gateway (Node.js + Python + Docker):** Designed an asynchronous gateway integrating transactional banking feeds with relational PostgreSQL databases, enforcing strict schema vali-

dation and token-based authentication.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy & Economics** – Ca' Foscari University of Venice (2018 – 2022)
  Rigorous foundation in formal logic, decision systems, computational semantics, and quantitative reasoning.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Spanish (Elementary understanding).
- **Work Authorization & Legal Status:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy) – Unrestricted legal right to live and work across the European Union (including Spain) without visa sponsorship. Immediate availability for relocation to Madrid.
