Prabhavit Gupta

Software Engineer (Applied AI): Full-Stack React, Python/FastAPI & AI-Native Features

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Applied AI software engineer and full-stack developer based in Venice, Italy with unrestricted European work authorization. Specializes in building AI-first product features end-to-end, combining modern React/TypeScript user interfaces with high-performance Python (FastAPI, SQLAlchemy) backend services and autonomous LLM agents. At FlowSpace, served as Lead Developer shipping production-ready AI workflows: engineered autonomous document parsing bots (900+ listings drafted), deployed customer-facing agents with confidence-gated escalation, and executed full-stack migrations scaling the platform to 4,500+ active users. Daily practitioner of modern AI development tooling (Claude Code, Cursor), spec-first testing, and rapid product iteration; available immediately.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), no sponsorship needed in the EU. Available immediately.

- **Languages:** Hindi (native), English (professional), Italian (beginner).

Core Skills

- **Applied AI & Agent Engineering:** Autonomous LLM agents, prompt engineering, tool calling, human-in-the-loop workflows, structured JSON extraction, RAG retrieval
- **Full-Stack Development:** React, Next.js, TypeScript, JavaScript, Python (FastAPI, SQLAlchemy, asyncio), RESTful APIs, webhooks, microservices
- **Data & Storage Architecture:** PostgreSQL, Supabase, relational data modeling, schema migration, vector search, query performance
- **Developer Velocity & Quality:** Claude Code, Cursor, Git/GitHub, Docker, CI/CD automated delivery, Playwright end-to-end testing, Postman, Jira
