Prabhavit Gupta

Senior Infrastructure & Security Engineer: GCP, Terraform & SRE

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident / Unrestricted EU Work Authorization)

Summary

Senior Infrastructure, Platform, and Security Engineer with 3 years of commercial production experience designing, automating, and maintaining cloud platforms on Google Cloud Platform (GCP), Terraform infrastructure-as-code, and resilient SRE operations. Proven track record architecting secure multi-tenant microservices on GCP (Cloud Run, Cloud SQL, GCS, IAM, Secret Manager), implementing zero-trust network boundaries, and automating security-compliant CI/CD pipelines via GitHub Actions. Experienced engineering audit-ready compliance postures (SOC 2, ISO 27001 evidence automation, vulnerability scanning) and observability stacks delivering 99.8% uptime. Based in Venice, Italy (CET time zone, matching Paris) with an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across France and all EU member states, no visa sponsorship required); available immediately for full-time remote roles.

Technical Expertise

- **GCP Cloud Infrastructure:** Google Cloud Platform (GCP), Cloud Run, Cloud SQL, Google Cloud Storage (GCS), Secret Manager, IAM least-privilege policies, VPC networking, Cloud Armor, GKE.
- **Infrastructure as Code (IaC):** Terraform (production module design, state management, drift detection, automated plan validation), Docker containerization, Linux systems internals.
- **Security & Compliance:** SOC 2 / ISO 27001 audit evidence automation, vulnerability management, dependency scanning (Trivy, Dependabot), TLS/PKI encryption in transit and at rest.
- **CI/CD & SRE Operations:** GitHub Actions workflows, blue/green deployments, automated rollbacks, Prometheus and Grafana telemetry, SLO/SLI definition, structured JSON logging.
- **Languages & Backend:** Python (FastAPI, asyncio, scripts), TypeScript/Node.js, SQL (PostgreSQL query optimization, partitioning), Bash shell automation.
- **Languages & Work Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU countries, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Infrastructure, Security & Platform Engineer *London, UK (remote)*

- Architected and maintained the complete production GCP cloud footprint using Terraform, provisioning Cloud Run services, managed Cloud SQL instances, IAM security boundaries, and VPC networks.
- Established automated GitHub Actions CI/CD deployment pipelines with built-in SAST security scans, secret masking, and progressive zero-downtime releases for 4,500+ enterprise users.
- Implemented SOC 2 compliant operational safeguards including automated access review logging, encrypted storage buckets, Secret Manager rotation, and tamper-evident audit trails.
- Configured end-to-end platform observability using Prometheus, structured cloud logging, and automated alerting, sustaining 99.8% production availability against strict SLAs.
- Hardened microservice Docker container images and network ingress rules, decreasing platform vulnerability exposure to zero critical CVEs.

Urlink **Apr 2025 - Jul 2025**
Cloud Platform & Security Developer (Freelance) *Barcelona, Spain (remote)*

- Automated multi-environment cloud infrastructure provisioning across staging and production using modular Terraform configurations and Docker.
- Configured automated database encryption, automated backup verification, and disaster recovery procedures for enterprise customer data.
- Built automated integration test suites and security contract tests using pytest and Playwright to validate security headers, authentication cookies, and API authorization controls.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Cloud Infrastructure & Systems Engineer *Venice, Italy*

- Deployed secure cloud architectures and automated webhook microservices for European SMB clients, enforcing TLS termination and secret isolation.
- Implemented database migration pipelines, automated backup cron jobs, and Linux systemd monitoring daemons.
- Produced comprehensive infrastructure documentation, disaster recovery runbooks, and security compliance matrices for client engineering leadership.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, statistical inference, quantitative economics, and complex systems modeling.
