Prabhavit Gupta

Software Engineer: Python, TypeScript, API Integrations & Performance

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident)

Summary

Software Engineer with 3 years of hands-on experience designing, developing, and debugging production-grade software in Python3 and TypeScript. Proven expertise analyzing complex software defects, diagnosing latency and memory bottlenecks, refactoring legacy services for maintainability, and writing clean, idiomatic, well-tested code. Experienced building RESTful API integrations, asynchronous messaging architectures, and automated testing suites. Based in Venice, Italy (CET time zone) with an EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no sponsorship required); available immediately for contract and remote software engineering roles ($50–$100/hr).

Technical Expertise

- **Core Programming Languages:** Python3 (FastAPI, asyncio, pandas, NumPy, Pydantic, pytest), TypeScript, JavaScript (Node.js, ES6+), modern asynchronous paradigms.
- **Software Quality & Debugging:** Root cause analysis, memory profiling, latency optimization, legacy refactoring, defensive coding patterns, automated contract and integration testing with Playwright and Jest.
- **Backend Systems & Architecture:** RESTful API design, microservices, asynchronous task queues (Redis, Celery), webhook processing, JSON schema validation, distributed system fault tolerance.
- **Database Systems & Storage:** PostgreSQL schema design, indexing, connection pooling, transactional integrity, Redis caching, vector databases.
- **DevOps & Version Control:** Git, GitHub Actions, CI/CD pipeline automation, Docker containerization, Linux environment administration.
- **Languages & Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Software Systems Architect *London, UK (remote)*

- Engineered high-performance backend API services and data synchronization pipelines for a marketplace platform serving 4,500+ active enterprise users.
- Diagnosed and resolved critical software defects and database query bottlenecks, reducing p95 API response times and improving system stability.
- Refactored legacy monolithic services into modular TypeScript and Python microservices, improving code readability and test coverage.
- Implemented asynchronous Redis queues to decouple long-running data processing tasks from synchronous HTTP request cycles.
- Built comprehensive automated end-to-end and regression test suites with Playwright, enforcing strict CI/CD quality gates across continuous releases.
- Produced clear, technical documentation, architectural decision records (ADRs), and API specifications for internal and external developers.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Delivered custom web features, backend services, and automated data pipelines using TypeScript, Node.js, and PostgreSQL.
- Integrated third-party SaaS APIs, billing providers (Stripe), and real-time database webhooks, implementing robust retry logic and error boundaries.
- Conducted systematic code reviews and performance profiling, improving frontend rendering speeds and database query efficiency.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Software Engineer & Integration Developer *Venice, Italy*

- Developed custom Python automation utilities, API middleware, and ETL scripts for European SMB clients.

- Resolved integration defects and data format inconsistencies across disparate enterprise platforms, ensuring high data reliability.
- Authored developer onboarding guides, deployment scripts, and unit tests to ensure long-term codebase maintainability.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
