Prabhavit Gupta

Forward Deployed Engineer: AI Inferencing Workflows, Cloud & MLOps Integration

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Forward Deployed Engineer with 3 years of hands-on experience designing, shipping, and embedding production AI solutions, workflow automation, and custom cloud/API integrations. Proven track record partnering directly with enterprise technical stakeholders to translate mission-critical use cases into robust, production-grade applications, custom data ingestion pipelines, and grounded agentic workflows. Deep technical proficiency in Python, TypeScript, SQL, Bash, and containerized architectures (Docker), with hands-on experience deploying automated test suites (Playwright), schema-driven tool calling, and observability harnesses. Highly autonomous builder operating daily with AI-native tools (Claude Code) to move rapidly from discovery to production-grade deployment. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without visa sponsorship). Immediately available.

Technical Expertise

- **Solutions & Forward Deployed Engineering:** Customer-embedded delivery, discovery workshops, translating business requirements into tested software, reusable integration templates, SLA-conscious architecture.
- **AI & Inferencing Workflows:** Generative AI solutions, agentic runtimes, structured outputs / tool calling, Retrieval-Augmented Generation (RAG), prompt optimization, guardrails and fallback escalation.
- **Core Stack & Integration:** Python, TypeScript, Node.js, Next.js, Bash, SQL, RESTful APIs, Webhook architectures, JSON schema validation, automated end-to-end testing with Playwright, Git.
- **Cloud & Data Infrastructure:** PostgreSQL, Supabase, Docker, containerized workloads, cloud services (AWS/GCP), relational data modeling, data pipeline orchestration (n8n), logging & trace observability.
- **AI-Native Development:** Daily default power user of Claude Code and modern AI agent tooling for high-velocity software engineering and continuous refactoring.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted work authorization in Italy and EU without visa sponsorship).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built and operated the production AI customer support agent on a coworking platform serving 4,500+ active users, handling live inquiries on pricing, availability, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus), engineering strict tool-call schemas and fallback logic that escalated to humans on low confidence.
- Evaluated model performance and failure modes against real production transcripts rather than synthetic benchmarks, systematically eliminating hallucinations in inventory and pricing answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window usage to reduce operational cost while maintaining rapid response times.
- Deployed automated end-to-end test suites using Playwright, verifying API contracts and continuous integration stability across customer booking journeys.
- Spearheaded platform migration from a legacy stack to a modern Next.js and Laravel architecture, scaling capacity from 2,000 to 4,500+ users.
- Built automated data ingestion pipelines that parsed and validated unstructured partner listings, scaling platform inventory to 900+ active locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Architected web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic.
- Implemented automated validation pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring data consistency.
- Integrated CI/CD workflows and automated regression checks to accelerate feature delivery.

Independent Technical Consultant **Aug 2023 - Feb 2024**

AI Solutions & Automation Engineer *Venice, Italy*

- Designed bespoke AI workflows, automated web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, repetitive business operations into automated software solutions with structured logging and error recovery.
- Engineered webhook listeners and real-time synchronization pipelines across CRM and operational tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous foundation in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
