# Prabhavit Gupta

Forward Deployed Engineer: Full-Stack Systems, AI Agents & Enterprise Workforces

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Relocating to Barcelona, Spain)

## Summary

Forward Deployed Software Engineer and Lead Developer with 3 years of hands-on production experience architecting autonomous agent runtimes, customer integration pipelines, and full-stack enterprise applications. Proven track record embedding directly with operational teams and client stakeholders—translating complex manual workflows into robust, automated AI systems that take action, interact with third-party APIs, and execute deterministically. Proficient across the modern full stack in TypeScript, Node.js, React, Next.js, and Python, with deep practical specialization in applied AI: schema-enforced tool calling, automated evaluation over real conversational transcripts, latency profiling, and guardrails. Previously based in Barcelona delivering engineering solutions with Urlink; holder of EU Long-Term Residence Permit (permanent unrestricted EU work authorization in Spain without visa sponsorship) and ready for immediate relocation and travel.

## Technical Expertise

- **Forward Deployed & Customer Engineering:** Fast discovery cycles, operational workflow mapping, translating complex business processes into scoped technical deliverables, live stakeholder demos, integration runbooks.
- **Full-Stack TypeScript & Python Stack:** TypeScript, JavaScript, Node.js, React, Next.js, Python (FastAPI), RESTful API design, webhook synchronization architectures, automated testing (Playwright).
- **Applied AI & Agent Orchestration:** Multi-step agent workflows, schema-enforced tool and function calling, LLM grounding against live databases, guardrails, fallback escalation logic, production evaluation loops.
- **Data Modeling & Backend Systems:** PostgreSQL, Prisma, Supabase, relational schema design & migrations, structured JSON extraction and validation, Redis caching.
- **DevOps & System Ownership:** Docker containerization, AWS/GCP cloud environments, CI/CD pipelines, Git, workflow automation (n8n), logging and trace observability.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Spanish (Basic), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted work authorization in Spain and EU, no visa sponsorship required).

## Experience

**FlowSpace.co** **Mar 2024 - Aug 2026**
*Lead Developer & AI Systems Architect* *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support agent runtime on a live platform serving 4,500+ active users, automating customer inquiries across pricing, venue inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and fallback escalation logic that routed complex inquiries to staff.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and eliminating hallucinated answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining rapid response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.
- Built automated data ingestion and transformation pipelines parsing and validating unstructured partner listings, expanding platform inventory to over 900 locations.

**Urlink** **Apr 2025 - Jul 2025**
*Project Manager & Solutions Developer (Freelance)* *Barcelona, Spain (remote / hybrid)*

- Architected core web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic for client-facing features.
- Implemented automated validation and synchronization pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring relational data integrity.

- Integrated automated CI/CD workflows and regression checks to accelerate feature delivery across distributed development environments.

**Independent Technical Consultant** **Aug 2023 - Feb 2024**
*AI Solutions & Automation Engineer* *Venice, Italy*

- Designed and delivered bespoke AI automation workflows, web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, fragmented business operations into automated software solutions with structured logging, retry queues, and reliable recovery logic.
- Engineered webhook listeners and real-time synchronization pipelines across CRM platforms, operational tools, and relational datastores.

## Education

**Ca' Foscari University of Venice** **2020 - 2024**
*BA in Philosophy, International Studies and Economics* *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
