Summary

Engineer with about three years of experience building integrations and AI-driven automations together with customers. At FlowSpace I built support agents that answer against live platform data and escalate to a person on low confidence, an LLM ingestion pipeline with human review (900+ listings drafted), and OfficeRnD and Nexudus integrations over REST APIs, webhooks and OAuth, and led a live migration off a legacy stack. I work in TypeScript and JavaScript, use Python at working level, and design agent workflows around clear rules and a human check where a wrong answer is costly. Based in Venice, available immediately for remote work.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*
