Application: Forward Deployed Engineer, Leadbay

Dear Hiring Team,

I am applying for the Forward Deployed Engineer role. Watching what a sales team does, shipping a first working version quickly and improving it from what they use, is how I like to work.

At FlowSpace I built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n, support agents that answer against live platform data and escalate to a person on low confidence, and an LLM ingestion pipeline with human review that drafted 900+ listings from PDFs, web pages, photos and spreadsheets. I use MCP and Claude Code, write Python at working level, and have a public repo, llm-doc-parser, on GitHub. I worked directly with the sales and operations team and an external agency.

On the gaps: I have not held a Forward Deployed Engineer title, my customer-facing work has been delivery rather than landing and expanding accounts, and I have not presented to C-level buyers. My degree is in Philosophy, International Studies and Economics. I have about three years of experience.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Paris for the role. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
