Application: Sales Engineer, Lio

Dear Hiring Team,

I am applying for the Sales Engineer role in Munich. Turning a customer's requirements into working software is the part of my work I do best, and I would like to do it closer to the customer.

At FlowSpace I built support agents that answer against live platform data and escalate to a person on low confidence, and an LLM ingestion pipeline with human review that drafted 900+ listings from PDFs, web pages, photos and spreadsheets. I integrated the OfficeRnD and Nexudus APIs with OAuth and webhooks, and led a live migration off a legacy stack to a coded Next.js and Laravel product, where I mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover while the platform grew from 2,000 to 4,500+ users. I worked with customers, the sales and operations team and an external agency, and prototyped with Claude Code.

On the gaps, plainly: my customer-facing experience is on the delivery side. I have not held a sales engineer or pre-sales title, and I have not given live product demos or led technical workshops for prospects or enterprise buyers. I have no procurement software background and no cloud platform administration experience. My Python is at working level, alongside TypeScript. I have about three years of experience.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Munich for the on-site role. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
