Prabhavit Gupta

Technical Demo Engineer: Conversational AI, Pre-Sales Architecture & Custom Integrations

+39 344 427 9427 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Remote Italy / B2B or Full-Time)

Summary

Technical Demo Engineer and AI Systems Architect with 3 years of hands-on production engineering experience building, customizing, and delivering enterprise conversational AI platforms, interactive proof-of-concept demos, and mission-critical customer care automation. Skilled in translating complex enterprise architectures—across NLU, ASR, LLM orchestration, deterministic guardrails, and third-party backend APIs—into compelling, robust, and customer-aligned live demonstration environments for enterprise buyers and technical evaluators. Proven background partnering with sales leadership and account executives throughout discovery, solution design, technical deep dives, and production validation. Extensive hands-on development in Python, JavaScript/TypeScript, RESTful microservices, and event-driven webhook architectures. Based in Venice, Italy, holding an EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no visa sponsorship required), available immediately for full-time or B2B engagement.

Technical Expertise

- **Conversational AI & Demo Architecture:** Interactive enterprise product demos, conversational dialogue flows, intent routing, NLU/ASR integration, LLM orchestration and guardrails, voice/digital customer care simulation, stateful session handling.
- **Pre-Sales & Technical Solutions:** Technical discovery mapping, architectural reviews, customized POC/POV delivery, live executive/IT stakeholder demos, objection handling, solution validation sessions, reusable demo asset libraries.
- **Software Development & Scripting:** Python (FastAPI, Flask, scripts), JavaScript/TypeScript, Node.js, Next.js, JSON Schema validation, asynchronous event processing, Redis queues.
- **API Integration & Systems Architecture:** RESTful APIs, Webhooks, GraphQL, OAuth2/OIDC authentication, third-party CRM and CCaaS integration, SQL/PostgreSQL schema design.
- **Evaluation, Quality & Tooling:** Trace-level evaluation harnesses over real interaction logs, deterministic fallback escalation, Playwright end-to-end automated testing, Git CI/CD.
- **Languages & Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected and deployed the production AI customer care and conversational automation runtime serving 4,500+ active enterprise users across pricing, booking logic, and operational venue workflows.
- Designed, built, and presented custom conversational demo environments and interactive prototypes for prospective commercial partners, demonstrating real-time API integrations and business ROI.
- Grounded conversational AI responses against live operational databases and enterprise partner APIs (OfficeRnD, Nexudus) via strict JSON tool schemas and deterministic validation, eliminating hallucinations.
- Built automated evaluation loops analyzing real conversational interaction transcripts and execution traces, identifying edge cases and establishing predictable fallback escalation paths.
- Profiled latency and API token consumption across model versions, optimizing conversational prompt templates and context window utilization to maintain sub-second response times.
- Engineered resilient webhook listeners and event-driven data pipelines connecting conversational agents with external CRM systems and scheduling tools, maintaining 99.9% uptime.
- Implemented end-to-end automated regression test suites using Playwright, verifying API contracts and conversational workflow reliability across continuous deployment releases.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Partnered with commercial stakeholders during client discovery to define technical specifications, API contracts, integration milestones, and interactive demonstration prototypes.

- Built automated validation and data synchronization pipelines connecting third-party web services to PostgreSQL datastores, eliminating manual entry and enforcing relational integrity.
- Created tailored technical demo environments to validate client feature requests ahead of sprint execution, accelerating stakeholder sign-off cycles.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed, built, and delivered tailored conversational workflows, API integrations, and automation engines for European enterprise and SME clients using Python, TypeScript, and modern orchestration runtimes.
- Developed and demonstrated custom live proof-of-concept solutions for business stakeholders, translating manual operational processes into reliable automated systems.
- Conducted technical stakeholder walkthroughs, platform onboarding, and sales-enablement training, ensuring high adoption and satisfaction across newly deployed tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
