Summary

I build full-stack products and ship them in production. I write TypeScript, Next.js, Node.js and Python, and wire LLMs and APIs into the app end to end. Most of my work has been owning features from idea to production with a human in the loop, at small teams and startups. A sample of my code: github.com/prab-gupta/llm-doc-parser.

Skills

- **Languages & frameworks:** TypeScript, JavaScript, Next.js, Node.js, Laravel (PHP), Python
- **AI:** LLM integration, AI agents, RAG, content generation, data extraction, prompt engineering, OpenAI/Claude APIs, Eden AI, Claude Code, n8n
- **APIs & data:** REST APIs, webhooks, Supabase, Postgres, third-party integrations (OfficeRnD, Nexudus, Google, CRM)
- **Testing & QA:** Playwright, unit testing, human-in-the-loop review
- **Tools:** GitHub, Postman, Jira, Figma

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace and its existing system, learned how it worked, and worked with the team to migrate it from a legacy stack to a coded Next.js and Laravel stack. Mapped the data model, drove the cutover, and scaled the platform from 2,000 to 4,500+ users.
- Shipped full-stack features end to end: the Next.js frontend, the backend, and the AI layer on top.
- Built an AI listing bot with a human in the loop. It takes a brochure in any format, drafts the listing with an LLM, and pushes it to the backend after review.
- Cut manual support work with AI agents that answer customer queries against live data.
- Built CRM and GTM automations for lead capture, enrichment, routing and outbound, and the OfficeRnD and Nexudus booking integrations.
- Worked with the internal team and an external agency on delivery, and resolved customer issues end to end.

Get2Germany.com **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) *Berlin, Germany*
