Application: Solutions Architect, Southern Europe, Cohere

Dear Hiring Team,

I am applying for the Solutions Architect role for Southern Europe. Taking a business problem, building the LLM solution for it and staying with it until the people using it trust it is the work I have done for about three years.

At FlowSpace I built support agents that answer against live platform data and escalate to a person on low confidence, and an LLM ingestion pipeline with human review that drafted 900+ listings from PDFs, web pages, photos and spreadsheets. I also built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n, and led a live migration off a legacy stack to a coded Next.js and Laravel product, where I mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover while the platform grew from 2,000 to 4,500+ users. I work with tool use, RAG and MCP, write Python at working level, and use Claude Code every day.

On the gaps, plainly: I have not held a Solutions Architect, Solutions Engineer or Forward Deployed Engineer title, and my work has been delivery rather than pre-sales. I have about three years of experience in total, so the 3+ years is at its lower end. I have not presented to executives or built business cases, and I have not designed evaluation frameworks for customer pilots; my quality checks are human review and confidence thresholds. I have no formal machine learning training background. My degree is a Bachelor's in Philosophy, International Studies and Economics, and my Italian is at beginner level.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. Remote work suits me, and I am open to relocating to Paris. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
