Summary

AI Solutions Architect and Systems Engineer with 3 years of commercial experience designing and deploying production-grade LangGraph architectures, autonomous multi-agent platforms, and enterprise AI integrations. Specialized in architecting stateful agent graphs, cyclical reasoning loops, dynamic tool selection, and deterministic human-in-the-loop guardrails. Proven track record in orchestrating high-precision RAG pipelines, connecting LLMs to enterprise APIs and databases, and establishing automated evaluation and observability frameworks (LangSmith, Langfuse). Based in Venice, Italy with permanent EU work authorization (Permesso di Soggiorno UE a Tempo Indeterminato, Italian Partita IVA ready, immediate start).
