Application: Implementation Consultant, Deliverect

Dear Hiring Team,

I am applying for the Implementation Consultant role. Taking a customer from a technical plan to a working integration, and making sure they can run it afterwards, is the work I have spent the last three years doing.

At FlowSpace I worked directly with customers, the sales and operations team and an external agency. I integrated the OfficeRnD and Nexudus APIs with OAuth and webhooks for automated bookings, led a live migration off a legacy stack while the platform grew from 2,000 to 4,500+ users, and wrote the documentation and handover for what I shipped. When an integration misbehaves I trace the data between systems with Postman and tests, and I explain what I find to technical and non-technical people.

On the gaps: I have not held a dedicated implementation consultant, onboarding or technical account manager role, and my enablement experience is documentation and handover rather than formal client training sessions. I have not used Grafana, Sentry or Zendesk. I would pick up your platform and tooling quickly.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Milan for the hybrid setup. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
