Prabhavit Gupta

Forward Deployed Engineer: Agentic Automations, Enterprise Integrations & Workflows

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Forward Deployed Engineer and Automation Architect with 3 years of hands-on experience designing, building, and deploying mission-critical workflow automations, enterprise API integrations, and LLM-powered agent pipelines across European tech operations. Proven expertise embedding directly with business stakeholders and non-technical operators to translate undocumented, ambiguous processes into reliable, deterministic code and resilient automated workflows. Deep background in API integration (REST, webhooks, Supabase, third-party platforms), automated regression testing with Playwright, and LLM tool/function calling. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without sponsorship). Immediately available.

Technical Expertise

- **Enterprise Automation & Workflow Systems:** n8n, Workflow orchestration, Agentic systems, Exception handling architectures, Playwright end-to-end automations, Webhooks, Idempotent synchronization.
- **LLM & Neurosymbolic Engineering:** LLM function calling, Tool use, Prompt engineering, Structured output extraction, RAG, Conversational interfaces, Knowledge ingestion pipelines.
- **Forward Deployed & Solutions Engineering:** Technical discovery, Requirements scoping with business teams, Rapid POC delivery, Production troubleshooting, Enterprise onboarding.
- **Full Stack & Integration APIs:** TypeScript, JavaScript, Node.js, Working-level Python, Next.js, React, RESTful APIs, Supabase, PostgreSQL, Docker, Git.
- **Languages & Work Authorization:** Hindi (Native), English (C1 Professional), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted EU work authorization; no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Directed full-stack platform architecture and integration engineering, embedding with commercial stakeholders to automate manual booking, billing, and inventory processes.
- Architected and deployed production customer support AI agents using LLM tool calling and live REST API function calling to query platform availability and execute bookings with deterministic safety checks.
- Resolved complex edge-case synchronization issues between external management systems (OfficeRnD, Nexudus) and internal databases using idempotent webhook reconciliation and automated exception handling.
- Built an automated knowledge ingestion pipeline: parsed heterogeneous unstructured documents (PDFs, spreadsheets, web pages) into structured database records, creating 900+ verified listings.
- Developed automated test harnesses and end-to-end validation suites with Playwright to verify customer-facing workflows and prevent regressions across multi-step integration paths.
- Served as the primary technical contact for enterprise B2B space partners, guiding onboarding, configuring API integrations, and troubleshooting production sync discrepancies.
- Scaled platform user base from 2,000 to 4,500+ active users through iterative product engineering and resilient frontend automations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical delivery of AI-assisted web applications, coordinating API contracts, database schemas, and external service integrations.
- Evaluated commercial LLM APIs across task types, optimizing prompt structures, schema adherence, and model selection for latency and output consistency.
- Implemented automated CI/CD checks and validation suites, ensuring clean code releases and minimal deployment regressions.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Developed custom web automations, integration prototypes, and data extraction pipelines for European SME clients using TypeScript, Playwright, and APIs.
- Partnered directly with non-technical business founders to analyze operational bottlenecks, translating manual paper and spreadsheet workflows into automated software solutions.
- Implemented webhook listeners and data synchronization flows, replacing manual administrative processes and improving data accuracy.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- In-depth focus on formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
