Prabhavit Gupta

AI Engineer | Client Integrations, Agent Troubleshooting, API Architectures & State Machines

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Relocation Ready to Barcelona | Immediate Availability)

Executive Summary

- **AI Engineering & Agent Integration Specialist:** Technical solutions and AI engineer with 3 years commercial software experience deploying, troubleshooting, and integrating conversational AI agents, state machines, and webhook APIs into client systems.
- **Rapid Diagnostic & Technical Troubleshooting:** Adept at auditing complex AI conversation traces, debugging malformed JSON payloads, identifying state transition failures, and resolving API connectivity bottlenecks across third-party SaaS platforms and WhatsApp gateways.
- **Cross-Functional Bridge & Barcelona Alignment:** Experienced collaborating directly with clients, customer success, onboarding, and core engineering to translate edge-case bugs into actionable product enhancements. Prior experience working with Barcelona-based technology ventures (Urlink), with EU permanent residency and immediate relocation availability.

Technical Skills & Core Competencies

- **AI Agents & State Machines:** Conversational AI Workflows, Agent Behavior Auditing, State Transition Logic, Multi-Step Tool Execution, Prompt Configuration, Guardrails.
- **API & Integration Engineering:** REST APIs, Webhooks, JSON Data Validation, WhatsApp Business Integrations, Slack Integrations, Zapier, Postman, Microservices.
- **Software Development:** Python (Debugging, Scripting, AsyncIO, PyTest), TypeScript, Node.js, Git, GitHub Actions, Docker.
- **Telemetry & Support Operations:** Conversation Trace Auditing (Langfuse), Issue Logging, SLA Incident Management, Technical Documentation, Bug Triage.

Professional Experience

AI Engineer & Integration Specialist • *Independent / AI Product Engineering Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid Europe)

- Deployed and maintained custom AI agents and automation pipelines for European clients, serving as the technical escalations lead for unexpected agent behavior and integration failures.
- Diagnosed and resolved API connectivity issues across CRM, messaging, and database webhooks, standardizing JSON schemas and validation routines to eliminate payload drops.
- Audited multi-turn conversational transcripts and tool-calling execution traces with Langfuse, isolating prompt hallucinations and faulty logic gates before client escalation.
- Built technical documentation, integration FAQs, and diagnostic runbooks, accelerating customer onboarding and reducing first-response resolution times by 40%.
- Collaborated with client technical leads and executive stakeholders to evaluate feature feasibility and translate customer feedback into core system enhancements.

Project Manager & AI-Assisted Developer • *Urlink*
Apr 2025 – Jul 2025 • Barcelona, Spain (Remote)

- Managed product delivery and technical integration for a fast-paced Barcelona tech venture, coordinating client requirement scoping and AI-driven feature implementations.
- Implemented custom API workflows, webhook listeners, and third-party data synchronization across Supabase databases and modern frontend interfaces.
- Maintained strict code quality and integration stability, debugging asynchronous event handling and ensuring seamless client system operation.

Lead Developer & Technical Integration Specialist • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Scaled platform user base from 2,000 to 4,500+ users by engineering automated API integrations (Nexudus, Office RND) and resolving cross-system synchronization conflicts.
- Streamlined client onboarding and user support by deploying intelligent automation agents, reducing manual intervention by over 65%.
- Authored end-to-end integration test suites with Playwright, systematically detecting regressions in customer booking flows.

Key Engineering Projects

- **AI Agent Diagnostic & Audit Harness (Python + Langfuse + REST):** Automated pipeline that intercepts conversation logs, evaluates state-machine progression, flags abnormal termination paths, and alerts support teams with structured stack traces.
- **Multi-Channel Webhook Gateway (Python + FastAPI):** Resilient integration bridge handling asynchronous events across messaging platforms (WhatsApp, Slack) with automatic retry logic and payload normalization.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy & Economics** – Ca' Foscari University of Venice (2018 – 2022)
  Rigorous foundation in formal logic, statistical reasoning, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Spanish (Elementary understanding).
- **Work Authorization & Legal Status:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy) – Unrestricted legal right to live and work in Spain/Barcelona without visa sponsorship; available immediately for hybrid Barcelona collaboration.
