Summary

AI and automation engineer with about three years of experience building internal AI tools and workflows that teams use every day. At FlowSpace I built support agents with escalation to a person, an LLM ingestion pipeline with human review (900+ listings drafted), and CRM and GTM automations (lead capture, enrichment, outbound) in n8n, on top of REST APIs and SQL databases. I use Claude Code and MCP daily and choose between an agent, a workflow builder or plain code depending on what is fastest. Based in Venice, open to relocating to Stockholm, available immediately.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**

Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*
