Dear Chromatic Hiring Team,

I am writing to express my strong enthusiasm for the Senior Solutions Engineer role at Chromatic. As an engineer specializing in frontend architectures, developer tooling, and platform integrations, I have long admired how Chromatic and Storybook have set the standard for component-driven UI development and visual testing across the modern web ecosystem.

In my role as Lead Developer at FlowSpace, I led our migration to a modern Next.js, React, and TypeScript architecture and established automated end-to-end regression suites using Playwright. Serving as the primary technical point of contact for external enterprise partners, I routinely led technical onboarding, designed integration architecture, and troubleshot complex production issues. I also architected automated document extraction pipelines handling 900+ verified listings and resolved subtle race conditions and webhook delivery failures across external APIs.

Key areas where my background aligns with Chromatic's mission:

- **Frontend Expertise & Tooling:** Deep hands-on experience with modern JavaScript/TypeScript, React, Next.js, build tools, component architecture, and automated testing harnesses.
- **Enterprise Solutions & Onboarding:** Proven ability to act as a trusted technical advisor, demystifying complex technical concepts, mapping customer workflows into clear implementation plans, and driving adoption.
- **Technical Troubleshooting:** Methodical root-cause investigation skills for edge cases, build issues, and webhook/API sync discrepancies in distributed environments.
- **Customer Advocacy:** Strong empathy for developer experience and a consistent habit of translating real customer friction into structured feedback for Product and Engineering.

Based in Venice, Italy, I hold an EU Long Term Residence Permit providing unrestricted right to work across the EU without requiring visa sponsorship. I work comfortably across European time zones and am immediately available to join Chromatic.

I would welcome the opportunity to discuss how my technical and solutions background can help drive customer onboarding and success at Chromatic.

Kind regards,

Prabhavit Gupta
