Prabhavit Gupta

Forward Deployed AI Engineer: GenAI Solutions, Client Integration & Production Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Relocating to Copenhagen)

Summary

Forward Deployed AI Engineer with 3 years of hands-on experience designing, shipping, and embedding production AI solutions, data pipelines, and full-stack integrations. Proven track record partnering directly with technical and business client stakeholders to translate complex operational pain points into scoped, working prototypes in days and hardened production deployments in weeks. Deep engineering proficiency across Python, TypeScript, PostgreSQL, and cloud deployments (AWS/GCP), with expertise in applied generative AI (agentic workflows, RAG, tool calling, schema-enforced JSON extraction), and automated testing (Playwright). Pragmatic builder who operates daily with AI-native tools (Claude Code) and understands when to deploy GenAI versus deterministic rules. EU Long Term Residence Permit holder (unrestricted EU work authorization without visa sponsorship), currently based in Venice, Italy and actively planning relocation to Copenhagen. Immediately available.

Technical Expertise

- **Forward Deployed & Client Engineering:** Fast discovery cycles, translating operational problems into scoped technical specifications, architectural mapping, designing for client handover, stakeholder communication.
- **Applied Generative AI & Agents:** Agentic workflows, Retrieval-Augmented Generation (RAG), prompt & context engineering, structured JSON tool calling, guardrails, fallback escalation, transcript evaluation.
- **Full-Stack Engineering & Stack:** Python (backend), TypeScript / JavaScript (frontend), Node.js, Next.js, FastAPI, RESTful APIs, Webhook architectures, automated testing with Playwright, Git.
- **Data Modeling & Cloud Foundations:** PostgreSQL, Supabase, schema design & table relations, cloud deployments (AWS/GCP), Docker, workflow orchestration (n8n), logging & trace observability.
- **AI-Native Development:** Daily default power user of Claude Code and modern AI agent tooling for high-velocity software engineering and continuous refactoring.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted work authorization; actively planning relocation to Copenhagen).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built and operated the production AI customer support agent on a platform serving 4,500+ active users, handling live inquiries on pricing, inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus), engineering strict tool-call schemas and fallback logic that escalated to humans on low confidence.
- Evaluated model performance and failure modes against real production transcripts rather than synthetic benchmarks, systematically eliminating hallucinations in inventory and pricing answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window usage to reduce operational cost while maintaining rapid response times.
- Deployed automated end-to-end test suites using Playwright, verifying API contracts and continuous integration stability across customer booking journeys.
- Spearheaded platform migration from a legacy stack to a modern Next.js and Laravel architecture, scaling capacity from 2,000 to 4,500+ users.
- Built automated data ingestion pipelines that parsed and validated unstructured partner listings, scaling platform inventory to 900+ active locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Architected web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic.
- Implemented automated validation pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring data consistency.
- Integrated CI/CD workflows and automated regression checks to accelerate feature delivery.

Independent Technical Consultant **Aug 2023 - Feb 2024**

AI Solutions & Automation Engineer *Venice, Italy*

- Designed bespoke AI workflows, automated web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, repetitive business operations into automated software solutions with structured logging and error recovery.
- Engineered webhook listeners and real-time synchronization pipelines across CRM and operational tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous foundation in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
