Prabhavit Gupta

AI-First QA Automation Engineer: Playwright, Agentic Test Harnesses & CI/CD

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

AI-First QA Automation Engineer based in Venice, Italy with European Long-Term Residence (unrestricted EU work authorization) and immediate availability for remote roles. 3+ years of hands-on production experience architecting end-to-end test automation frameworks, API validation suites, and AI evaluation harnesses using Playwright (TypeScript & Python). Proven track record embedding AI-driven testing workflows to accelerate test scenario generation, validate non-deterministic LLM agent behavior (tool use, structured outputs, prompt alignment), and perform automated root-cause failure analysis. Proficient in integrating automated test gates into GitHub Actions CI/CD pipelines, containerized environments, and Linux production systems.

Experience

FlowSpace.co • *Lead Developer & AI Systems Architect (Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Designed, built, and scaled comprehensive automated test suites using Playwright (TypeScript and Python) for a high-traffic platform serving 4,500+ active enterprise users, maintaining low flakiness and high test reliability.
- Built specialized evaluation harnesses to validate LLM features and autonomous agent workflows, assessing instruction following, tool invocation accuracy, and structured schema outputs against ground-truth benchmarks.
- Implemented automated validation pipelines for complex unstructured multi-format data ingestion (PDFs, images, spreadsheets), enforcing strict schema boundaries before data persistence.
- Embedded automated Playwright regression testing and health checks into GitHub Actions CI/CD workflows, catching API contract drift early and achieving zero regression incidents across deployments.
- Leveraged Claude Code and LLM agent tooling to automate test case authoring, synthesize edge-case API payloads, and automate log analysis during root-cause triage.
- Coordinated testing frameworks and quality gates across engineering disciplines and external partners during major backend migrations.
- *Tools: Playwright, TypeScript, Python, Claude Code, GitHub Actions, Docker, REST APIs, Supabase, Linux*

Urlink • *Project Manager & Solutions Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain (remote)

- Built automated validation workflows and customer-facing agent prototypes for client onboarding and document ingestion.
- Established automated API validation suites and integration checks connecting third-party services to PostgreSQL databases, guaranteeing data consistency.
- Managed project delivery end-to-end: gathered requirements, established testing coverage criteria, built POC prototypes, and delivered maintainable documentation.
- *Tools: Python, TypeScript, Postman, Claude Code, Supabase, REST APIs*

Independent Technical Consultant • *AI Automation & Integration Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Developed and deployed custom automated integration test scripts, webhook validation listeners, and data extraction pipelines using Python, TypeScript, and n8n.
- Replaced manual QA verification processes with automated regression test flows, featuring robust retry mechanisms, structured failure alerts, and automated reporting.
- Documented testing procedures, test coverage matrices, and API contracts for client engineering teams.
- *Tools: Python, TypeScript, n8n, Supabase, Webhooks, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands (remote)

- Integrated LLM API workflows and email verification services, debugged responsive web applications, and built test scenarios for core user funnels.
- *Tools: OpenAI API, Sendgrid, Figma, REST APIs*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), unrestricted EU work authorization, no sponsorship needed. Available immediately.
- **Languages:** English (fluent / C1 professional), Hindi (native), Italian (beginner).

Core Skills

- **Test Automation & Frameworks:** Playwright (TypeScript & Python), PyTest, E2E testing, API contract testing, component testing, regression test suite maintenance, flakiness reduction, headless CI browser automation.
- **AI Testing & Agent Harnesses:** AI-assisted test generation, agent test harnesses, LLM evaluation pipelines, prompt regression testing, tool-use validation, synthetic data generation, Claude Code workflows.
- **Programming & Web Technologies:** TypeScript, Python, Node.js, RESTful APIs, JSON schema validation, asynchronous execution patterns, Git version control.
- **DevOps & CI/CD:** GitHub Actions, Docker containerization, Linux environment configuration, automated test reporting, root-cause log analysis.
