Prabhavit Gupta

Media Monitoring Automation Specialist: Workflow Orchestration & Data Pipelines

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident)

Summary

Automation and Data Pipeline Specialist with 3 years of commercial production experience converting manual content monitoring and extraction processes into scalable, automated workflows. Proven track record architecting event-driven web scraping pipelines, structured document parsing routines, and automated quality verification checks using Python, TypeScript, RESTful webhooks, and modern LLM APIs. Detail-oriented systems builder experienced managing data acquisition pipelines and ensuring consistent delivery quality across global services. Based in Venice, Italy (CET time zone) with an EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no sponsorship required); available immediately for full-time remote roles.

Technical Expertise

- **Workflow Automation & Orchestration:** Scalable workflow configuration, transitioning manual processes to automation, n8n, event-driven webhooks, scheduled cron jobs, queue-based pipeline routing (Redis).
- **Media Monitoring & Content Extraction:** Web scraping (Playwright, BeautifulSoup), full-text extraction, RSS/news feeds, unstructured text parsing, sentiment and entity classification with LLMs.
- **Software Development & Scripting:** Python (asyncio, pandas, NumPy, requests), TypeScript, Node.js, regex pattern matching, structured JSON schema validation.
- **Data Management & Quality Control:** PostgreSQL data normalization, automated anomaly detection, deduplication, audit trails, and data provenance verification.
- **DevOps & Monitoring:** Docker containerization, Git version control, CI/CD pipeline automation, error tracking, automated alert notifications.
- **Languages & Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Automation Systems Architect *London, UK (remote)*

- Transitioned manual partner data onboarding into fully automated ingestion and monitoring workflows, processing unstructured data from 4,500+ active enterprise accounts.
- Developed automated web extraction and monitoring routines using Playwright and Python, detecting external catalog changes and triggering automated updates.
- Implemented automated LLM-based categorization and extraction pipelines, converting unstructured text into normalized database records.
- Engineered asynchronous task processing queues using Redis to handle high-volume data streams without impacting real-time user query performance.
- Built automated monitoring dashboards and error alerting to ensure data integrity, pipeline throughput, and immediate anomaly notification.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical workflow design and delivery of automated data synchronization services connecting third-party analytics endpoints to centralized PostgreSQL databases.
- Configured automated validation scripts and integration health checks to verify data quality and reduce synchronization latency.
- Designed operational documentation and workflow runbooks to support continuous pipeline maintenance.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Automation & Workflow Developer *Venice, Italy*

- Built and deployed custom automated content monitoring and reporting pipelines for European SMBs using Python and n8n.

- Replaced repetitive manual reporting workflows with automated email and Slack digest delivery pipelines.
- Authored technical workflow documentation and user guides for non-technical operations teams.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
