Application: GTM Engineer, Corti

Dear Hiring Team,

I am applying for the GTM Engineer role. Building the systems that let a commercial team work from clean, connected data, and the automations that remove their repetitive steps, is the work I have done at FlowSpace.

There I built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n, and integrated the OfficeRnD and Nexudus APIs with OAuth and webhooks. I work in TypeScript and Node.js with Supabase, used Google Analytics and Microsoft Clarity for tracking, and built an LLM ingestion pipeline with human review that drafted 900+ listings from PDFs, web pages, photos and spreadsheets. I documented what I built and worked directly with the sales and operations team.

On the gaps: I have not worked with named CRM platforms such as HubSpot, Salesforce or Pipedrive, or with Stripe, Attio, PostHog, Mixpanel or Segment. I have no healthcare background, and my backend work is as much Laravel as Node.js. My Python is at working level. I have about three years of experience.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Copenhagen for the hybrid role. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
