Application: AI Systems Builder & Automation Specialist, Quinta Filippa

Dear Hiring Team,

I am applying for the AI Systems Builder and Automation Specialist role. Finding the repetitive work in a business and building the automation or assistant that removes it is what I have done for three years, and I like that this is a builder role.

At FlowSpace I built support agents that answer against live platform data and escalate to a person on low confidence, an LLM ingestion pipeline with human review that drafted 900+ listings from PDFs, web pages, photos and spreadsheets, and OfficeRnD and Nexudus integrations for automated bookings. I also built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n. I work with Make, Zapier and n8n, use Claude and Claude Code, and built a dashboard for companies at Qomodo.

On the gaps: I have no hospitality, tourism or reservation-system background and have not worked with Bookinglayer or a PMS. I do not speak Portuguese. I have not built automated management reporting across accounting, marketing and review platforms, nor WhatsApp automations, and I have not trained teams on AI tools. My Python is at working level. I have about three years of experience.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Leiria for the role. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
