Prabhavit Gupta

Solutions Engineer | Enterprise AI Agents, Knowledge Retrieval & Custom LLM Workflows

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Relocation Ready to Paris | Immediate Availability)

Executive Summary

- **Solutions Engineering & Enterprise AI Adoption:** Solutions-oriented AI Engineer with 3 years commercial software experience guiding organizations through the technical evaluation, scoping, and deployment of production LLM agents and intelligent workflows.
- **Custom Agent Architecture & Tool Integrations:** Deep hands-on experience designing custom agentic workflows, multi-step tool execution pipelines, Model Context Protocol (MCP) integrations, and connecting unstructured enterprise data into governed knowledge retrieval systems.
- **Technical Demonstrations & Customer Empathy:** Proven ability to bridge technical complexity and business outcomes, delivering compelling proof-of-concept demos, unblocking customer pilots, and translating user feedback directly into product requirements. Holds EU Permanent Residency with unrestricted right to work in France.

Technical Skills & Core Competencies

- **AI Operating Systems & Agents:** Custom LLM Agents, Multi-Agent Collaboration, Model Context Protocol (MCP), Tool Calling, Prompt Engineering, Evaluation Baselines (DeepEval, RAGAS), Structured Outputs.
- **Enterprise Integrations & APIs:** REST/GraphQL APIs, OAuth2, Webhook Architectures, CRM/Workspace Connectors (Slack, Notion, CRMs), Asynchronous Processing.
- **Software Development & Full Stack:** TypeScript, Python, Node.js, Next.js, React, SQL, PostgreSQL (pgvector), SQLite, Docker, Postman.
- **Solutions Consulting & Delivery:** Pre-Sales Architecture, Tailored Technical Demonstrations, Use Case Scoping, Pilot Execution, Stakeholder Onboarding, Customer Feedback Synthesis.

Professional Experience

AI Solutions Consultant & Forward Deployed Engineer • *Independent / AI Product Engineering Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid Europe)

- Partnered with prospective enterprise clients and internal sales stakeholders to scope technical requirements, architect custom LLM agent prototypes, and guide pilots to production completion.
- Delivered hands-on technical demonstrations showcasing how governed AI agents and semantic retrieval transform daily operational workflows across enterprise teams.
- Built custom Model Context Protocol (MCP) tool servers and API connectors enabling autonomous agents to safely access enterprise databases, search indices, and external SaaS tools.
- Designed evaluation baselines and observability dashboards using Langfuse to track prompt accuracy, tool dispatch reliability, and token expenditure during client evaluations.
- Gathered recurring integration pain points and customer feature requests from pilot teams, translating findings directly into technical specifications for engineering roadmaps.

Lead Developer & Product Engineer • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Scaled platform from 2,000 to 4,500+ active users, architecting core backend features, third-party integrations, and automated customer-facing agents.
- Migrated the live production platform off a legacy stack onto Next.js and Laravel without downtime or service disruption for members.
- Deployed autonomous customer support agents querying live booking databases with strict validation boundaries and human-in-the-loop escalation.
- Built automated data ingestion and web extraction pipelines aggregating unstructured venue data across multiple European markets.

Full-Stack AI Software Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Shipped automation services and API integrations in Python and TypeScript, connecting disparate enterprise systems and databases.
- Implemented continuous integration pipelines with automated test suites in Docker, reducing deployment cycle times.
- Collaborated directly with business end-users to understand operational workflows and translate requirements into reliable software tools.

Key Engineering Projects

- **Enterprise Agentic Workspace Gateway (MCP + Python + TypeScript):** Architected an extensible tool harness allowing LLM agents to execute read/write operations against workspace tools with role-based access control and detailed audit tracing.
- **Automated Document Ingestion & Semantic Pipeline (Python + Claude API):** Built an automated pipeline ingesting unstructured corporate documents, extracting structured entities, and populating searchable knowledge bases.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy, International Studies & Economics** – Ca' Foscari University of Venice (2020 – 2024)
  Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Legal Status & Availability:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy). Full unrestricted right to work across the EU (including France) without visa sponsorship; ready for relocation to Paris.
