Prabhavit Gupta

Forward Deployed AI Architect: Agentic Systems, Python & Full-Stack Delivery

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident)

Summary

Forward Deployed AI Architect and Full-Stack Systems Engineer with 3 years of commercial production experience designing, embedding, and scaling autonomous agentic AI platforms. Proven expertise working in forward-deployed models alongside enterprise client teams, utilizing Claude AI and agentic coding accelerators to dramatically shorten time-to-market. Deep practical knowledge across Python backend microservices, modern React/TypeScript user interfaces, tool-using agents, and enterprise RAG architectures. Based in Venice, Italy (CET time zone) with an EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no sponsorship required); available immediately for full-time remote roles.

Technical Expertise

- **Forward Deployed & Agentic AI Architecture:** Embedded client engineering, translating enterprise requirements into production architectures, autonomous tool-calling agents, Model Context Protocol (MCP), LangChain, LangGraph state machines.
- **AI Accelerators & Development Workflows:** Advanced utilization of Claude AI, Claude Code, and agentic IDE environments for high-velocity software delivery, code reviews, and automated refactoring.
- **Full-Stack & Backend Engineering:** Python (FastAPI, asyncio, pandas, NumPy, Pydantic), TypeScript, Node.js, React.js (modern state management, responsive UI design), Next.js, RESTful microservices.
- **Data Infrastructure & Storage:** PostgreSQL (schema design, indexing, transactional integrity), Redis (caching, task queues), vector embeddings, hybrid retrieval pipelines.
- **Testing & DevOps:** Automated end-to-end testing with Playwright, CI/CD pipeline automation with GitHub Actions, Docker containerization, cloud service integrations.
- **Languages & Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Forward Deployed & Lead AI Engineer *London, UK (remote)*

- Embedded directly with client technical teams in a forward-deployed model to architect, deploy, and scale production AI systems for 4,500+ active enterprise users.
- Architected autonomous tool-calling agents and custom Model Context Protocol (MCP) servers, enabling secure querying across customer databases, REST APIs, and multi-repo codebases.
- Built modern full-stack interfaces in React, Next.js, and TypeScript, delivering responsive dashboards for monitoring agentic workflow execution.
- Leveraged Claude AI and agentic workflows to increase development velocity and automate test generation, achieving 99.8% release uptime across continuous CI/CD deployments.
- Developed high-throughput Python (FastAPI) backend services, utilizing Redis asynchronous queues and PostgreSQL relational data stores.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical discovery, solution architecture, and delivery of custom full-stack web platforms and automated data synchronization services.
- Built ETL data ingestion pipelines connecting third-party APIs to PostgreSQL databases, maintaining strict data freshness and provenance.
- Created interactive prototypes in React to validate functional specifications prior to production delivery.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Automation & Integration Developer *Venice, Italy*

- Built and deployed custom Python automation microservices, webhook listeners, and LLM integrations for European SMB clients.

- Engineered agentic workflow scripts and structured data extraction routines to eliminate manual operational bottlenecks.
- Authored technical architecture documentation, API guides, and system configuration manuals for client engineering teams.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
