Prabhavit Gupta

Forward Deployed AI Engineer: Agentic Methodologies, Cross-Functional Systems & LLM Automation

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Forward Deployed AI Engineer with 3 years of hands-on experience designing, shipping, and embedding production AI agents, intelligent workflow automation, and cross-functional LLM tooling. Proven track record partnering directly with product, sales, marketing, and operations teams to identify workflow bottlenecks and deploy robust agentic solutions grounded in live operational databases and APIs. Strong engineering foundations across TypeScript, Python, PostgreSQL, and modern frontend interfaces (Next.js/React), with hands-on expertise in prompt engineering, schema validation, RAG architectures, and automated testing (Playwright). Pragmatic builder who leverages AI-native development tools (Claude Code) daily for rapid delivery and continuous refactoring. Based locally in Venice, Italy with permanent EU work authorization (EU Long Term Residence Permit) and immediate availability.

Technical Expertise

- **Agentic Systems & Workflows:** Autonomous AI agents, Tool/function calling, RAG pipelines, Semantic search, Prompt optimization, Guardrails, Fallback escalation, Production transcript evaluation.
- **Forward Deployed & Cross-Functional Delivery:** Embedding with product, marketing, and business teams, rapid prototyping to production, translating messy workflows into automated architectures, platform feedback loops.
- **Engineering Stack:** TypeScript, Python, Node.js, Next.js, React, RESTful APIs, Webhook architectures, JSON schema validation, automated testing with Playwright, Git.
- **Data Stores & Cloud Foundations:** PostgreSQL, Supabase, Relational schema design, Docker, Cloud environments (AWS), data ingestion pipelines, n8n workflow orchestration, trace logging.
- **AI-Native Development:** Daily default power user of Claude Code and modern AI agent tooling for high-velocity software engineering and continuous refactoring.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted work authorization in Italy and EU without visa sponsorship).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built and operated the production AI customer support agent on a platform serving 4,500+ active users, handling live inquiries on pricing, inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus), engineering strict tool-call schemas and fallback logic that escalated to humans on low confidence.
- Evaluated model performance and failure modes against real production transcripts rather than synthetic benchmarks, systematically eliminating hallucinations in inventory and pricing answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window usage to reduce operational cost while maintaining rapid response times.
- Deployed automated end-to-end test suites using Playwright, verifying API contracts and continuous integration stability across customer booking journeys.
- Spearheaded platform migration from a legacy stack to a modern Next.js and Laravel architecture, scaling capacity from 2,000 to 4,500+ users.
- Built automated data ingestion pipelines that parsed and validated unstructured partner listings, scaling platform inventory to 900+ active locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Architected web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic.
- Implemented automated validation pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring data consistency.
- Integrated CI/CD workflows and automated regression checks to accelerate feature delivery.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed bespoke AI workflows, automated web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, repetitive business operations into automated software solutions with structured logging and error recovery.
- Engineered webhook listeners and real-time synchronization pipelines across CRM and operational tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous foundation in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
